State Superintendent's Advisory Council

The State Superintendent's Advisory Council is composed of the following seven division superintendents who represented the regions indicated during 1972-73:

Region No. 1: Chairman, J. K. Samples, Superintendent of Hanover County Public Schools, 205 Hanover Ave., Ashland 23005.

Amelia Co.	Emporia City	New Kent Co.
Brunswick Co.	Goochland Co.	Nottoway Co.
Buckingham Co.	Greensville Co.	Petersburg City
Charles City Co.	Halifax Co.	Powhatan Co.
Charlotte Co.	Hanover Co.	Prince Edward Co.
Chesterfield Co.	Henrico Co.	Prince George Co.
Colonial Heights City	Hopewell City	Richmond City
Cumberland Co.	Lunenburg Co.	South Boston City
Dinwiddie Co.	Mecklenburg Co.	Sussex Co.
		Surry Co.

Region No. 2: Chairman, E. E. Brickell, Superintendent of Virginia Beach City Public Schools, P. O. Box 6038, Virginia Beach 23456.

Accomack Co.	James City Co.	Portsmouth City
Cape Charles	Nansemond Co.	Southampton Co.
Chesapeake City	Newport News City	Suffolk City
Franklin City	Norfolk City	Virginia Beach City
Hampton City	Northampton Co.	Williamsburg City
Isle of Wight Co.	Poquoson	York Co.

Region No. 3: Chairman, W. A. Harrow, Jr., Superintendent of Essex-Middlesex County Public Schools, Saluda 23149.

Caroline Co.	King and Queen Co.	Northumberland Co.
Colonial Beach	King William Co.	Richmond Co.
Essex Co.	Lancaster Co.	Spotsylvania Co.
Gloucester Co.	Mathews Co.	Stafford Co.
King George Co.	Middlesex Co.	West Point
		Westmoreland Co.

Region No. 4: Chairman, R. E. Butt, Superintendent of Loudoun County Public Schools, 20 Union Street, Leesburg 22075.

Alexandria City	Falls Church City	Page Co.
Arlington Co.	Fauquier Co.	Prince William Co.
Clarke Co.	Frederick Co.	Rappahannock Co.
Culpeper Co.	Loudoun Co.	Shenandoah Co.
Fairfax City	Madison Co.	Warren Co.
Fairfax Co.	Orange Co.	Winchester City

Region No. 5: Chairman, G. Hunter Jones, Jr., Superintendent of Campbell County Public Schools, Rustburg 24588.

Albemarle Co.	Buena Vista City	Lexington City
Amherst Co.	Campbell Co.	Louisa Co.
Appomattox Co.	Charlottesville City	Lynchburg City
Augusta Co.	Fluvanna Co.	Nelson Co.
Bath Co.	Greene Co.	Rockbridge Co.
Bedford City	Harrisonburg City	Rockingham Co.
Bedford Co.	Highland Co.	Staunton City
		Waynesboro City

Region No. 6: Chairman, C. I. Dillon, Jr., Superintendent of Franklin County Public Schools, 146 Main Street, Rocky Mount 24151.

Alleghany Co.	Floyd Co.	Patrick Co.
Botetourt Co.	Franklin Co.	Pittsylvania Co.
Clifton Forge City	Giles Co.	Pulaski Co.
Covington City	Henry Co.	Radford City
Craig Co.	Martinsville City	Roanoke City
Danville City	Montgomery Co.	Roanoke Co.
		Salem City

Region No. 7: Chairman, James E. Hodges, Superintendent of Grayson County Public Schools, Independence 24348.

Bland Co.	Galax City	Scott Co.
Bristol City	Grayson Co.	Smyth Co.
Buchanan Co.	Lee Co.	Tazewell Co.
Carroll Co.	Norton City	Washington Co.
Dickenson Co.	Russell Co.	Wise Co.
Fries	Saltville	Wythe Co.

INTRODUCTION

During 1972-73, 1,104,102 pupils were enrolled in 1,777 public elementary and high schools in Virginia, and 57,581 people were employed in instructional positions as classroom teachers, visiting teachers, librarians, counselors, principals, assistant principals, supervisors, and directors of instruction.

In addition to the pupils in regular day school programs, 50,559 adults were enrolled in general and basic education classes and 112,302 others were in vocational education programs provided through the public schools.

State, local, and federal expenditures for public education totaled \$1,177,184,999 during the fiscal year ended June 30, 1973. Besides these expenditures, Virginians had more than \$2,000,000,000 invested in public school property.

STANDARDS OF QUALITY

Standards of Quality and Objectives for Virginia's public schools were approved by the General Assembly and became effective July 1, 1972—an event that ranks as one of the major developments in the history of public education in the Commonwealth.

The standards, which were adopted by the Board of Education and presented to the General Assembly pursuant to requirements of the revised State Constitution, apply to public school personnel, instructional materials, programs, and planning and management. An amendment approved by the General Assembly in 1973 was designed to provide improved working relationships between teachers, administrators, and local school boards.

Staff members of the Department of Education worked in 22 teams throughout the year to provide assistance to help school divisions meet the standards.

By June 30, 1973, revised standards had been prepared for approval by the Board of Education and by the 1974 session of the General Assembly.

QUALITY SUPPLEMENT BY GENERAL ASSEMBLY

In October 1972 Governor Linwood Holton appointed a task force to determine the cost of implementing the Standards of Quality, local ability to pay this cost, and the method of distributing a supplemental appropriation during 1973-74 to enable localities to meet this cost.

Following receipt of the task force report the Governor requested the General Assembly to approve a formula which would provide for the apportionment of the cost of an educational program between the

Commonwealth and the local units of government and to appropriate the additional funds necessary to meet the State's share of the cost.

The General Assembly allocated \$24,700,000 in additional funds for fiscal 1973-74 to enable the State to meet the constitutional requirement for providing quality education. All but 35 of the State's 140 school divisions shared in this supplemental allocation. A minimum expenditure of \$628 per student in average daily membership was set as the "foundation cost" for the Standards of Quality. The Legislature also provided that the local share of the cost of education should be based on an expenditure equivalent to 80 cents per \$100 of the 1970 true value of property, plus the revenue from the one-cent sales tax earmarked for public education.

In its initial report the task force recommended that for the 1974-76 biennium the State abandon its traditional method of using true value of real property to determine local ability to finance public education. It suggested instead a composite index including true property values, personal income, and taxable retail sales. This recommendation, plus the proposal that the Basic School Aid Fund be distributed on the basis of 50 professional instructional staff members per 1,000 pupils in average daily membership (ADM), were among major suggestions made by the task force in a second report prepared for submission to the governor in July. The task force also recommended that:

- (1) After subtracting the one-cent sales tax for education, the cost of the basic program should be apportioned between the Commonwealth and school divisions of average capacity to pay on an equal basis—50 percent State and 50 percent local funds;

- (2) The State should provide for vocational and special education instructional costs that exceed the basic cost for regular instruction;

- (3) Each locality should provide a reading and mathematics skills development program for low-achieving pupils in grades K-6;

- (4) Incentive funds should be provided as a method for encouraging and rewarding school divisions that make an effort greater than that required to meet the Standards of Quality; and

- (5) Local units of government should be provided with a reasonable period of time to adjust local financial patterns to this recommended program. Any loss in total State support per ADM should be prevented, and the amount of increased local expenditures required in any one year should be limited.

OTHER LEGISLATIVE ACTION

Other action by the 1973 General Assembly in support of education included passage of bills or resolutions which:

- Changed the entrance age for enrollment in kindergarten from September 30 to October 31, effective with the 1973-74 school year;
- Authorized the Board of Education to operate two or more pilot projects "to determine optimal methods for improving educational achievement of disadvantaged students" and provided a General Fund appropriation of \$500,000 to finance the program. Two projects—one in the city of Richmond and one in the city of Norfolk—were approved by the State Board to carry out the legislative mandate.

The Board of Education also was directed to study the need for reevaluating reading abilities in public schools; study and report on textbooks used in public schools to determine whether they treat racial matters "fairly and without discrimination;" study school bus safety features; and to develop a plan and program of environmental education.

REORGANIZATION OF THE DEPARTMENT OF EDUCATION

A major reorganization of the Department of Education was accomplished during 1972-73.

All divisions except the Division of Telecommunications and all services of the Department, except the Proprietary School Service and the Office for School Integration Service, were grouped in broad functional areas: Instruction, Administration and Finance, Professional and Educational Support Services, and Program Development.

The Division of Telecommunications and the Office of School Integration Services—both high priority activities—operate under the supervision of the deputy superintendent. The Proprietary School Service is responsible to the assistant superintendent for administrative field services.

The reorganization was proposed by the state superintendent to increase the Department's leadership capability, clarify responsibilities, place the majority of day-to-day operational decisions in the office of five assistant superintendents, and to coordinate more effectively the increasingly complex activities of the Department.

In preparing the proposed organizational changes the superintendent of public instruction was assisted by the American Management Association's consultative services on educational planning and management. Recommendations concerning the structure of the Office of Administration and Finance also were received from the School of Business Administration of the University of Richmond.

EARLY CHILDHOOD EDUCATION

More than 27,000 five-year-old children were enrolled in kindergarten programs in the State during 1972-73. Thirty-eight school divi-

sions provided kindergarten programs for all eligible children, and 13 divisions had such programs for some children.

Information submitted to the Department of Education by local superintendents indicated that 65 divisions would offer kindergarten classes for approximately 25,000 pupils for the first time in September 1973.

The Standards of Quality require that all school divisions that do not offer kindergarten programs during the 1972-74 biennium must develop plans and specify a date acceptable to the Board of Education for implementing such programs. The Board has adopted a policy specifying that September 1976 is the latest acceptable date for the inauguration of kindergarten programs by local school divisions.

To focus greater attention on the importance of kindergarten education, the State's first Conference on Early Childhood Education was called by Governor Holton. The conference, which was held in Richmond in March of 1973, attracted more than 250 persons from throughout the State.

GOVERNOR'S SCHOOL FOR THE GIFTED

The 1973 session of the General Assembly allotted funds to assist in providing special Statewide projects for gifted children. As a result, the Governor's School for the Gifted was conducted for the first time during the summer of 1973 at three centers—Mary Baldwin College, Mary Washington College, and the Virginia Museum of Fine Arts—with an enrollment of 400 gifted and talented students.

The students, rising juniors and seniors in public and private high schools who met criteria prescribed by the Department, were nominated by division superintendents or headmasters and were selected by a committee appointed by the State Board of Education.

The curriculum, designed for enrichment rather than acceleration, included the humanities, the natural sciences, the social sciences, and the fine arts. Concentrated instruction was provided each student in at least one subject in his major area of interest; however, all students were exposed to all aspects of the curriculum through field trips, lectures and performances by visiting scholars and artists, and informal discussions.

EDUCATIONAL RESEARCH

Year-round education came to a half-dozen Virginia localities during 1972-73 in an experiment designed to strengthen academic offerings and make increased use of physical facilities.

More than 20,000 students in the cities of Virginia Beach and Richmond and in Prince William, York, Roanoke, and Loudoun counties were involved in the year-round education program for which

the General Assembly appropriated \$1,000,000 in State aid for each year of the 1972-74 biennium.

The Department of Education, in cooperation with several local school divisions, was host in May of 1973 to the Fifth National Seminar on Year-Round Education. Approximately 850 persons participated in the seminar which was held at Virginia Beach.

In addition to the year-round school projects, the Department continued to encourage innovations in education through Title III of Public Law 89-10, pilot studies conducted cooperatively by the State and the localities, and other programs.

COMPARATIVE DATA ON PUBLIC EDUCATION IN VIRGINIA

*From Estimates of School Statistics, 1972-73 NEA.

†Includes 3,267 summer school graduates.

‡Positions as reported in Annual Report of Superintendent of Public Instruction.

ADMINISTRATION AND FINANCE

One of the major functions of the assistant superintendent for administration and finance and his staff is to provide service for all divisions in the State Department of Education. This includes housing, securing personnel and supplies, and other necessary assistance involved in the administration of the Department.

In addition to administrative services, the assistant superintendent is responsible for the distribution of the Basic School Aid Fund and certain other State and federal funds, and for the financial operation of the Department of Education. Funds are disbursed and records are kept in accordance with State laws and rules and regulations of the State Board of Education.

The assistant superintendent for administration and finance also recommends to the State Board approval of applications for Literary Fund loans to be used for school construction. Money from this fund is released for approved projects as it becomes available.

Other responsibilities of the office include preparation of budgetary recommendations for consideration by the superintendent of public instruction and the State Board, and handling financial transactions related to State teachers scholarship loans.

ADMINISTRATIVE FIELD SERVICES

The position of assistant superintendent for administrative field services was established by the State Board of Education effective February 1, 1972. The staff member in this position serves as liaison officer between the State Department of Education and the Virginia Association of School Administrators, the Virginia School Boards Association, and the Virginia Education Association. He also works with division superintendents on an individual basis and in groups, and provides general supervision for the Proprietary School Service in the State Department of Education.

The assistant superintendent for administrative field services is responsible to the superintendent of public instruction and advises him regarding major administrative problems at the local level. He also is responsible for planning the Annual Superintendents' Conference as well as structuring and conducting seminars for newly appointed superintendents, and for serving as the State super-

intendent's representative at meetings of division superintendents' study groups. He interprets on a continuing basis to division superintendents and appropriate educational organizations the State Board of Education's policies, regulations, programs, and general direction for public education.

PROPRIETARY SCHOOL SERVICE

The Proprietary School Service was established July 1970 to administer statutory requirements governing proprietary schools and the issuance of permits to their agents. The administration of this statute is directed by rules and regulations adopted by the State Board of Education in August 1970.

The 1972 General Assembly amended the statute to include, in addition to business, trade and technical, and home study schools, private schools for handicapped persons. For each of the four categories of schools, the State Board of Education has established an advisory committee consisting of five members, representing the type of school for which the committee functions.

A primary responsibility of this service is to receive and process applications for Certificates of Approval from proprietary schools and agents' permits from representatives of schools located within and outside of Virginia. Certificates are issued only to qualified in-State schools. Agents operating in Virginia and representing either in-State or out-of-State schools must qualify for and be issued permits.

During the school year 1972-73, the service issued 124 Certificates of Approval and 497 agents' permits, and was responsible for recovering more than \$6,000 in tuition lost from schools that closed.

The service is staffed by two professional persons who, in addition to reviewing applications, visit and inspect at least once annually every school under their jurisdiction.

INSTRUCTION

The Assistant Superintendent for Instruction is responsible for coordinating activities of divisions and services in the Department of Education which are responsible for instructional and pupil personnel programs. These divisions and services are Elementary Education, Secondary Education, Special Education, Vocational Education, Guidance, and Title I of the Elementary and Secondary Education Act (ESEA). Activities of the Guidance Service and the Title I, ESEA, program are given in detail in the reports of the Division of Special Services and the Special Assistant for Federal Programs, respectively.

DIVISION OF ELEMENTARY EDUCATION

Purpose and Scope

The Division of Elementary Education was established as a separate division in July 1972. Subsequently, three new supervisory positions were created for language arts, mathematics, and elementary school accreditation.

The major function of the Division of Elementary Education is to provide leadership for improving the quality of education in Virginia in keeping with State statutes and policies of the Board of Education. A related function is that of assisting in improving the services of supervisory personnel and elementary school principals. Division personnel continually study all phases of elementary education in the State, help determine progress in school divisions, identify problems in elementary education, and provide leadership and assistance in elementary school curriculum development and in the preparation of curriculum materials for school use.

The division staff serves, directly or indirectly, all school personnel concerned with elementary education. In 1972-73 these included 860 supervisory personnel, 1,199 principals involved in elementary education, and 30,486 classroom teachers in schools enrolling 684,432 pupils.

Accomplishments

Conferences. A Statewide conference for supervisory personnel, which had as its theme, "Redefining Supervision for Quality Education," was held during the year. Major features of the conference included addresses by outstanding educators. Workshop sessions focused on supervisors in action for quality education. The annual conference of elementary school principals emphasized the theme "Humanizing and Individualizing Instruction." Group discussions dealt with the individual school planning and management objectives as identified in the *Standards of Quality and Objectives for Public Schools in Virginia, 1972-74*.

Conferences also were held for elementary teachers of science, mathematics, reading, and kindergarten education. The purpose of these conferences was to focus attention on professional growth. Each of the conferences featured speeches by well-known authorities and workshop sessions which gave practical assistance to teachers in improving instruction. Approximately 2,032 school personnel attended these conferences.

A Tutor-Trainer Workshop, co-sponsored by the Division of Elementary Education and the National Reading Center, was held to train volunteers to assist in reading instruction.

Personnel of the division assisted in planning and arrangements for the Governor's Conference on Implementing Early Childhood Education, which was held in Richmond in February 1973.

Members of the staff also participated in conferences sponsored by the Virginia Education Association, the Southern Association of Colleges and Schools, the Association for Supervision and Curriculum Development, the National Science Teachers Association, the National Council of Teachers of Mathematics, the International Reading Conference, the National Council of State Consultants in Elementary Education, the National Association of Elementary Principals, the Conference for the Gifted and Talented, and the Association for Childhood Education International.

Accreditation of Elementary Schools. The State Board of Education in September 1969 adopted standards for use in accrediting elementary schools beginning with the 1970-71 school year. Standards established by the State Board must be met by all elementary schools. Analysis of reports submitted, together with information obtained through visitation by personnel of the State Department of Education, serve as the basis for a report to the State Board. Accreditation standards cover the broad areas of administration and organization, qualifications of school personnel, equipment and materials for instruction, buildings and grounds, and program.

The State Board based accreditation on the assessment of deficiencies disclosed in reports submitted to the Department of Education. Schools found to be deficient in meeting the standards were advised, warned, or not accredited, depending upon the seriousness of the deficiencies. Accreditation was based on the following assessment: schools recommended to be accredited had very few or no deficiencies; schools recommended to be accredited and advised had deficiencies which required prompt attention and correction; schools recommended to be accredited with a warning had deficiencies to the extent that failure to correct them might jeopardize future accreditation; schools not recommended for accreditation did not meet the *Standards for Accrediting Elementary Schools*, or have had such limited elementary programs that it was not feasible to apply the accreditation standards.

Curriculum Development. The Division of Elementary Education and a committee consisting of classroom teachers, supervisors, elementary principals, and a college representative developed the publication entitled *Elementary Science Guide—K-7*. Copies of the guide were distributed to classroom teachers, supervisors, and elementary school principals. Thirteen regional meetings were held throughout the State to orient teachers in the use of the guide.

The division continued to distribute curriculum materials to local school divisions and colleges and universities with teacher training programs. Approximately 50,800 curriculum guides were requested by local school systems and colleges and universities.

The guides that were distributed were: *Using Maps and Globes, K-7*; *Communication-A Language Arts Guide for Teachers, K-7*; *Elementary Science Guide, K-7*; *A Guide for Kindergarten Education*; *Elementary Mathematics Guide K-7*; *Elementary School Economics*; *A Good Day for Learning*; *Man and His Environment*; and *Getting Them Ready for School*. The latter publication was revised and reprinted in cooperation with the State Department of Health.

The Division of Elementary Education, in cooperation with the Division of Telecommunications and a committee representing broad involvement from all levels of education, produced a television series entitled VIRGINIA! and an accompanying manual for teachers. Regional workshops were held for teachers, and a Social Studies Leadership Conference was held to assist principals and supervisors in understanding and implementing the series.

The division staff continued to work on curriculum materials for art and music.

Field Work. During the year staff members made 1,567 classroom visits; worked in 75 counties and 23 cities and towns; participated in local workshops and conferences; met with superintendents, principals, supervisors; and worked with Parent-Teacher Associations. In addition eight visits were made to regional meetings of supervisors and elementary school principals. Members of the division's staff also served on task force teams for implementing the Standards of Quality.

The Cooperative Program in Elementary Education in the Southern Association of Colleges and Schools. School systems in states served by the Southern Association of Colleges and Schools may participate in an elementary school improvement program by becoming members of the Cooperative Program in Elementary Education. Since 1960-61 two options have been available to members of the Cooperative Program: (1) affiliated membership with a continuous program of school improvement conducted in each school, and (2) membership through accreditation. Affiliated membership for at least one year must precede application for membership through accreditation.

Virginia has a State Elementary Committee which is responsible for giving leadership in the State to the Southern Association's program of affiliation and accreditation of elementary schools. Members of the State Committee serve on the Association's Commission of Elementary Schools.

During the 1972-73 school year, 678 public, independent, and military reservation elementary schools were members of the Southern Association's Cooperative Program in Elementary Education, an increase of 42 above the figure for 1971-72. Forty-five public school divisions held divisionwide membership, and 28 individual

public schools, 12 independent schools, one campus school, and three military schools held membership.

The Commission of Elementary Schools has accredited 333 elementary schools since 1964. The accredited schools are in the following localities:

DIVISION OF SECONDARY EDUCATION

The Division of Secondary Education provides leadership and assistance for secondary education in the public schools of Virginia. The staff renders supervisory and administrative service to local school divisions and assists them in developing and maintaining quality education at the secondary level.

Division personnel are concerned primarily with improving instruction in academic subjects, including the fine arts, health and physical education, driver education, and adult education. The work is carried out through 11 different services: Adult Education; Art; Emergency Services Activities; Driver Education; English; Foreign Languages; Health and Physical Education, Safety, and Recreation; History, Government, and Geography; Mathematics; Music; and Science. The division also is responsible for approving and supervising projects conducted under Title III of the National Defense Education Act.

Staff members work with local school systems to achieve specific objectives. These include interpreting the policies of the State Board of Education; providing leadership in developing curriculum and improving instruction; giving impetus to the evaluation of secondary education; serving as a resource agency to assist in studying local problems; providing consultative services; assisting in accreditation procedures; and working with professional personnel at every educational level to improve secondary education.

Supervisors and their assistants in each service perform a number of important duties such as serving on evaluation committees, participating in Statewide conferences, arranging in-service opportunities for teachers, conducting surveys, addressing civic and educational groups, assisting in the development of library facilities, participating in regional and national efforts devoted to curriculum improvement, and conferring with representatives of school systems throughout Virginia.

Other accomplishments during the year included:

Accreditation of Secondary Schools

Accreditation standards designed to stimulate growth and improve programs provide a measure of quality in secondary schools. Section 22-21 of the Code of Virginia provides statutory authority for secondary school accreditation by the State Board of Education. The State Board is required to do all things necessary to encourage improvement of the schools, including accreditation according to prescribed standards. These standards serve as guidelines for secondary schools to help provide educational opportunities to meet the needs, interests, and goals of all students.

A full assessment of available data as revealed through the 1972-73 preliminary annual secondary school accreditation reports, summer secondary school accreditation reports, consultations with school officials, visits to schools, and correspondence from each school provided the basis for placing all public secondary schools in one of the following categories:

1. Schools Recommended to be Accredited: Schools that have very few or no deficiencies are listed in this category.
2. Schools Recommended to be Accredited and Advised of Deficiencies:

Schools in this category have deficiencies which require prompt attention and correction.

3. Schools Recommended to be Accredited with a Warning: Schools in this category have deficiencies to the extent that failure to correct them will jeopardize future accreditation.
4. Schools Not Recommended for Accreditation: Schools in this category have serious and extensive deficiencies.

The same procedure is followed for non-public secondary schools seeking accreditation.

During 1972-73, 479 public secondary schools (schools containing one or more of grades eight through 12), and 69 non-public secondary schools were accredited. Visits were made to 11 new public and two new non-public secondary schools which applied for accreditation for the first time. Eight previously accredited public secondary schools, and one previously accredited non-public secondary school were consolidated, discontinued, converted, or did not apply for accreditation during 1972-73.

High Schools Closed, Consolidated, or Converted. During 1972-73 the following public and private secondary schools were closed, consolidated, or converted:

<i>Division</i>	<i>School</i>	<i>Status</i>
Chesterfield County	Grange Hall	Converted to Elementary School
Russell County	Cleveland High School	Converted to Cleveland Junior High School
Scott County	Hilton Combined School	Converted to Elementary School
	Shoemaker Combined School	Converted to Elementary School
	Yuma Combined School	Converted to Elementary School
Sussex County	Stony Creek High School	Converted to Stony Creek Junior High School
	Waverly High School	Converted to Waverly Junior High School
Powhatan	St. Emma Military Academy	Closed

Conferences. The Division of Secondary Education sponsored and participated in numerous Statewide, regional, and divisional meetings, conferences, and workshops during 1972-73. Statewide conferences concerning curriculum and instruction were held for classroom teachers and supervisory personnel in the following subjects: Adult Education; Art; Driver Education; English; Foreign Languages; Health and Physical Education; History, Government, and Geography; Mathematics; Music; Science.

The annual conference of Virginia Secondary School Principals was held June 18-20, 1973, in Roanoke. The conference theme was "Demands on Curriculum

—Implications for the Principal.” More than 400 principals, assistant principals, superintendents, and other school administrators attended.

Southern Association of Colleges and Schools. The primary function of the Association is to improve education through regional accreditation of schools in 11 Southern states. The Association’s Commission on Secondary Schools recognizes quality education in secondary schools by granting membership based on the organization’s standards. Schools seek regional accreditation on a voluntary basis.

Two hundred and ninety-one public and private secondary schools in Virginia were accredited in 1972-73 at the 77th annual meeting held in New Orleans, La., in December 1972. Seventeen schools were granted initial accreditation and two schools were removed from the accredited list for a net gain of 15. Thirty of the 291 accredited schools are private secondary schools and the remainder are public schools.

Leadership for member schools is provided by the Virginia Secondary Committee composed of nine members and 12 associate members representing all geographic areas of the State. Operating within the Commission to carry out the Association’s policies, the members of the Virginia Secondary Committee seek to stimulate progress in member schools, promote conditions to enable member schools to meet requirements of the Association, and assist schools in obtaining membership. Six regional meetings were held during 1972-73 to assist member schools in improving their programs.

The supervisor of secondary education serves as executive secretary of the Virginia Committee.

Secondary School Evaluation—The evaluation program conducted by the State Department of Education gives direction and encouragement to local schools for the improvement of instruction through organized effort. Through the use of field personnel on visiting committees, valuable in-service training is provided for those individuals participating.

A training program for selected members of the staff of schools scheduled for evaluation in the near future was initiated during the summer of 1972.

The course carrying college credit was sponsored in cooperation with Radford College and the Southern Association of Colleges and Schools. Staff members participated in leadership and instructional roles. Forty-three people were enrolled in the course which extended from July 31 to August 11, 1972.

Cape Charles High School completed a self-study using the *Standard Criteria* and was evaluated by a visiting committee. In addition to Cape Charles High School, the following schools completed a self-study using the *Evaluative Criteria* and were evaluated by a visiting committee during 1972-73: Washington County—Abingdon High School; Amherst County—Amherst High School; Hampton City—Bethel High School; Culpeper County—Culpeper High School; Essex County—Essex High School; Galax City—Galax High School; Danville City—George Washington High School; Wythe County—George Wythe High School; Fairfax County—Groveton High School; Hopewell City—Hopewell High School; Washington County—John S. Battle High School; Virginia Beach City—Kempsville High School; Newport News City—Menchville High School; Patrick County—Patrick County High School; Town of Poquoson—Poquoson High School; Radford City—

Radford High School; Fairfax County—Stuart High School; Augusta County—Stuarts Draft High School; Bristol City—Virginia High School; Augusta County—Wilson Memorial High School; Chesterfield County—Chester Junior High School; Culpeper County—Culpeper Junior High School; Chesterfield County—Falling Creek Junior High School; Lynchburg City—Linkhorne Junior High School; Chesterfield County—Providence Junior High School; Lynchburg City—Sandusky Junior High School; and Spotsylvania County—Spotsylvania Junior High School.

ADULT EDUCATION

Alien Program. The program is conducted in cooperation with the U. S. Department of Justice, Immigration and Naturalization Service. The Justice Department provides at no cost a home study course designed to prepare the alien to take the naturalization test. The Adult Education Service mails course material to the alien whose address is provided by the Justice Department. Counseling service for the alien and assistance with his course are available in the local school system.

During 1972-73, 1,881 letters of welcome, 230 home study courses, and 20 letters of information concerning naturalization and home study courses were sent to aliens, and 10 non-resident aliens from other states sought information.

Basic Adult Education. The program is for adults whose inability to speak, read, or write the English language constitutes a substantial impairment of their ability to get or retain employment. It offers an eighth-grade education to adults 17 years of age or older.

Since 1965, 78,142 adults have been enrolled in the program. Of this number 14,246 completed the eighth grade. During 1972-73, 15,200 adults were enrolled and 3,150 completed the eighth grade. There were 310 students in the Direct Instruction for Adult Learning (DIAL) Program. Classes were offered in 99 school divisions.

The Annual Adult Education Supervisors Conference was held at the Donaldson Brown Center for Continuing Education, Blacksburg, on August 10 and 11. The conference stressed quality education through professional development in Virginia. Seventy supervisors of adult education attended the conference.

The Adult Education Service participated in the Region III Staff Development Project with the four assistant supervisors of adult education serving as staff development specialists. Twelve staff development workshops were held to improve teachers' competencies in recruiting and promoting students, selecting media, testing and evaluating students, and understanding the adult learner. More than 300 teachers and administrators participated in these staff development activities. Thirty participants received graduate credit for their participation in a two-weeks workshop dealing with the adult learner.

General Adult Education. The educational areas of study are directed toward helping adults to: (1) earn a high school diploma; (2) take high school courses to prepare for General Education Development (GED) tests; (3) upgrade their education; (4) speak English as a second language and become an American citizen; (5) learn more about home and parental responsibilities; (6) satisfy a vocational interest; (7) develop competence in community activities; (8) provide appealing activities for senior citizens; (9) fulfill the individual desire for

cultural enrichment; and (10) enable employed individuals to acquire additional knowledge and ability related to their work.

During the 1972-73 fiscal year, 33,359 adults were enrolled in 2,817 classes in 84 school divisions. State funds totaling \$165,000 were allocated for a minimum of 55,000 hours of instruction. These funds provided 22.7 percent of the cost of instructors' salaries. The average cost for an instructor was \$7.50 per hour. Reimbursement was made for 60 percent of the instructors' salaries not exceeding \$5 per hour.

General Educational Development (GED). The program is designed for persons who were enrolled in school but did not complete high school graduation requirements. The program provides an opportunity for these individuals to gain recognition for educational development since their withdrawal from school.

By achieving satisfactory scores on GED tests, adults may earn a high school equivalency certificate, qualify for admission to college or other advanced educational opportunities, and meet educational requirements for employment or promotion in a job. They also may satisfy educational qualifications for induction in the armed forces, and meet regulations of State and local license examining boards for occupations requiring educational competence at the ninth-, tenth-, or eleventh-grade level.

The number of GED testing centers increased from 37 to 38. During the year 8,305 took the GED battery of tests. Sixty-six percent (5,487) of the examinees qualified for a certificate. The average age of the examinees was 28.6 years. The average grade completed was 9.6 and the average years since attending school was 11.5. More males (51.5 percent) took the test than females (48.5 percent).

EMERGENCY SERVICES ACTIVITIES

The State Department of Education is one of the emergency services of the State. In this role the agency is responsible for functions related to economic stabilization, emergency services education, and emergency plans for schools.

In June 1973, the title reference "Civil Defense" was replaced by "Emergency Services," which is more indicative of the broad nature of the activities with which the State Department of Education is concerned. Also, the new title conforms to provisions of Virginia's Emergency Services and Disaster Law of 1973.

In the area of economic stabilization each division superintendent of schools, in coordination with the head of local government, is responsible for establishing an organization which would function in an emergency, until such time as the federal government could assume control. This organization would be responsible for registering all local residents, rationing, and the control of prices, wages, and rents. During 1972-73 continuing advice was given to school divisions to assist them in preparing their economic stabilization plans; 71 localities have plans which have been approved.

An eight-hour unit of instruction in Personal and Family Survival was initiated during 1972-73 and was directed primarily toward the ninth grade. Seventy-seven thousand students in grades 7-12 received instruction in Personal and Family Survival training; of that number 59,600 students completed eight or more hours of instruction. Four hundred and eleven teachers completed a 10-hour course and became fully qualified to serve as instructors of the unit in Personal and Family Survival.

The plans by which schools would function, in event of an emergency, to protect the lives of students and staff and minimize property damage are of primary concern to the Emergency Services Activities office. Information obtained by the office in supervising the emergency operations center for the Department is used to assist school divisions in preparing local plans. When hazardous conditions such as floods, tornadoes, hurricanes, and fires affect a community, immediate inquiry is made to determine the extent of damage to the school system. This action permits timely advice to key personnel of the Department and expedites processing of any resulting claims for federal assistance.

ART

As a member of the State Department of Education, the art supervisor and his staff provide leadership in the Statewide program of art education. The staff of the Art Education Service assists teachers, instructors, and administrative personnel by offering supervisory and advisory services. Basically, art supervision requires a creative approach in its continuing developmental process. Time and finances are important concerns, as well as the needs of those in the field which have a direct effect upon the work. Because of this, it is desirable to limit certain phases of the work from year to year and to shift emphasis as the need may arise. The following is a summary of activities during the year:

Planning

Planning is one of the initial considerations in determining the scope of work in the Art Education Service. It involves activities designed to find a means through which desirable results may be obtained. Planning is an ongoing process which requires a thorough understanding of art education needs throughout the State.

Field Visitation

Field visitation is one of the most important activities of the Art Education Service, and one of the most effective methods of working with a school system. It includes a variety of activities which range from working with individual art teachers in their classroom to the evaluation of county and city art programs. In carrying out this responsibility, staff members of the Art Education Service serve as consultants and coordinators.

In-Service Programs

To be most effective, in-service programs must be reevaluated constantly and new ideas and innovative methods must be tested. With this in mind, the art staff, in cooperation with the Virginia Commonwealth University Art Education Department, conducted a seminar entitled, *Issues in Art Education*. The purpose of the seminar was to bring together outstanding educators throughout the United States to work with teachers on important issues pertaining to art education and to education in general. The Art Education Service is attempting to further those innovative programs which will challenge art teachers to increase their effectiveness in developing art curriculum.

The service is continuing to participate in and to expand the multi-discipline workshops, which are conducted in cooperation with the Music and

Physical Education Services. These workshops are designed to help classroom teachers to integrate art, music, and dance in the school activities. Seventeen workshops have been completed during a four-year period.

Two conferences also were conducted this year for art supervisors and college personnel. The first centered on innovative programs throughout the State and a discussion of the *Standards of Quality and Objectives for Virginia Public Schools* which were enacted by the General Assembly in 1972. It was felt that the Standards of Quality were of such importance that an additional conference should be held to deal with that subject. This was planned and conducted using Dr. Charles Todd, Jr., director of planning for the State Department of Education, as a consultant.

The art service continues to conduct individual and pre-school workshops in school systems throughout the State. This has always been a large part of our in-service training programs and we feel it will continue to be so in the future. These workshops deal with individual problems and concerns in a given area.

Curriculum Material

Although funds were not available to publish the art guide for elementary schools this year, it is hoped that it will be possible to complete this project during 1973-74. The Art Education Service continued to work with individual school systems and art teachers in the development of local curriculum materials. During 1972-73 there were more requests for this service than in previous years, possibly as a result of the emphasis on the Standards of Quality and their implications for the school program throughout the State. The art staff continued to encourage and to distribute monographs on pertinent subjects in the field.

Evaluation

School evaluations have always been a part of the program of the continuing Art Education Service. Last year, as in other years, art personnel served on teams which evaluated high and junior high schools throughout the State. In addition, staff members evaluated numerous art departments, as well as art material, equipment, and blue prints for art rooms throughout the State. Staff members also cooperated with the School Libraries and Textbook Service and the Bureau of Teaching materials in evaluating material of all types.

Coordinative Activities

Among its other responsibilities, the Art Education Service coordinated activities between State agencies such as the Virginia Museum and the Governor's Commission for the Arts and Humanities. In addition, personnel of the service cooperated with local, State, and national art education associations, with colleges and universities, and with lay groups in an effort to bring about a better understanding of the philosophy and principles of good art education in the public schools. Members of the staff also served on various committees and participated in planning meetings with various agencies in the State to promote art education.

Research

Last year the Art Education Service, in cooperation with the Division of Educational Research and Statistics, assisted in selecting various school systems throughout the State to participate in developing and planning an Aesthetic Pilot Testing Program. Planning is under way for phase 2 of the project in which the service will continue to test the desirability of various visual packages as a means of enhancing the art program.

Public Relations and Personal Endeavors

As part of their public relations activities, staff members made numerous presentations to schools, community groups, and other lay organizations throughout the State, assisted in developing educational television programs, cooperated with the department's Film Production Service in selecting films of exceptional quality for the *CINE* Festival, and taught classes in crafts at the Virginia Music Camp.

DRIVER EDUCATION

The Driver Education Service provided direction, coordination, supervision, and promotion of driver education programs. Requests for assistance in 1972-73 increased significantly above the number received during the previous year.

Driver education, conducted in 305 high schools, continued to expand and improve. During 1972-73 the State-approved driver education course was completed by 65,975 students—more than 79 percent of all eligible students enrolled. Reimbursement requested by local school divisions totaled \$2,539,244. The first and second reimbursement periods were prorated due to the increase in the number of students. The amount prorated was based on approximately 38 percent of the total amount requested by the school divisions. Fifty-four schools offered adult and out-of-school youth training, and 1,035 students successfully completed the courses. Forty-four schools used driving simulators, 100 schools used multiple-car driving ranges, and 951 free-loan cars were used in the State.

The Driver Education Service has one supervisor and two assistant supervisors and two secretaries. Three of these positions are financed by funds received through projects written and approved under the Federal Highway Safety Act of 1966.

Colleges preparing teachers for driver education used staff assistance for curriculum development and evaluation. The Driver Education Service assisted teachers and administrators in organizing and developing programs, improving instructional techniques, and selecting materials and equipment for classroom and laboratory instruction. The slide presentation, "Expanding Driver Education in Virginia," was used extensively throughout the State. Various school divisions were granted State approval for semester scheduling. Quality programs, available to more students at lower cost, were recognized as unique features of semester course scheduling in driver education.

The State Board of Education, at its June 1972 meeting, approved an alternate plan (semester offering) for driver education which consists of both classroom and in-car instruction. Any school division may conduct this type of program if it meets the minimum requirements set by the State Board.

The alternate plan affects school divisions which elect to offer a driver education course consisting of a minimum of 80 periods of instruction for a half unit of credit. Within the 80 periods the minimum of 36 periods of classroom instruction and 14 periods of in-car instruction may be extended to provide for a greater variety of traffic situations. Under this plan, a separate driver education course may be scheduled in addition to the required health and physical education offering and shall in no way use time allotted for this requirement. Schools that elect to offer driver education as a separate course must devote the time previously allotted for the classroom phase of driver education to health education.

The Driver Education Service continued its working relationship with the Virginia Highway Safety Division, the Division of Motor Vehicles, and the Department of State Police. The service participated in local highway safety commission seminars conducted by the Highway Safety Division.

Staff personnel attended State, regional, and national driver education conferences. The regional conference plan was again successful, and attendance was good at the meeting that was held. Films, filmstrips, and publications were previewed and approved by staff personnel during the year.

Sixty-nine non-public schools conducted State-approved programs of driver education with 6,502 students enrolled.

Fifty-three commercial driver training schools, licensed by the director of professional and occupational registration and approved by the Driver Education Service, conducted State-approved programs. Working jointly with the Division of Motor Vehicles and the Department of State Police, the Driver Education Service continued to make available the Driver Education Certificate, which must be presented at the Division of Motor Vehicles examining station by a student applying for a Virginia operator's license. The certificate is issued to students who complete the State-approved driver education program.

On November 23, 1971, the first Driver Education Statistical Report for the school year 1970-71 was released. The report was made possible by the cooperative efforts of the Division of Motor Vehicles, which supplied the State Department of Education with data collected from the Driver Education Certificate.

Beginning July 1, 1972, the school code assigned to each public, private, parochial, or commercial school by the Division of Educational Research and Statistics was entered on each Driver Education Certificate issued. This procedure enabled the Driver Education Service to compile a statistical report for 1972-73 for all schools within a division. The report includes the percentage of students who successfully completed a State-approved Driver Education program and received operator's licenses, and the percentage of students who successfully completed a State-approved driver education program and received their licenses and subsequently were charged with traffic violations.

The State Department of Education continued to work with the Human Resources Research Organization and the National Highway Traffic Safety Administration to develop a model curriculum guide for driver education. Three states—Virginia, Maryland, and Missouri—will be involved in this study which is being supported by federal funds under the Highway Safety Act of 1966.

The annual State Conference for Health, Physical Education, and Driver Education was held at Natural Bridge for college and high school instructors.

ENGLISH SERVICE

During 1972-73 the work of the English Service was characterized by emphasis upon individualized instruction and by consultation with school personnel regarding accountability, behavioral objectives, and the reorganization of English programs in the high schools of the Commonwealth. Continuing attention was given to developmental reading and to English-related areas of speech, drama, and journalism.

Assistance given to schools and school divisions included serving as consultants and keynote speakers at preschool conferences, conducting in-service workshops, serving as members of task force committees for the Standards of Quality and Objectives, assisting in pilot study and experimental programs, serving on evaluating committees, and coordinating school evaluations. Members of the service also served as consultants for curriculum development. One such project resulted in a school division receiving the 1972 Freedom Foundations Award for outstanding achievement in promoting understanding to the American way of life. One member of the service also taught a mini-course as part of a certificate renewal program for teachers in one school division. A curriculum guide continued to be distributed to high schools, to education departments of colleges and universities in Virginia and other states, and in England.

Staff members worked with institutions of higher learning to improve coordination between high school and college English programs, reviewed proposals for approved programs of teacher preparation in English, and participated in one college's school evaluation workshop. A suggested reading list for college-bound students was compiled and published.

In cooperation with other agencies and organizations, members of the English Service spoke at district conferences and a conference sponsored by the Virginia Education Association, served as consultants to the National Council of Teachers of English, and served as judges for one-act play festivals and forensic activities of the Virginia High School League. One member of the service was also a consortium consultant for "Matter of Fact," a series of television programs on non-fictional literature produced by the National Instructional Television Center and WETA television station of Washington for use in schools in Kentucky, Ohio, New Jersey, and Virginia. Advisory assistance also was given to the Virginia Commission of the Arts and Humanities.

A filmstrip entitled, "Scenic Design in Virginia," was produced and distributed for use in dramatic arts classes and co-curricular drama groups. Preliminary work was begun on "Costume Design in Virginia," the second in a projected series on theatre arts. Two major activities affecting schools throughout the State were the adoption of new textbooks in English and English-related subjects, and the formation of a representative committee for developing a comprehensive curriculum guide for English in Grades 8-12. The service also reviewed supplementary books, previewed films and audio-visual materials, and processed NDEA applications.

One of the highlights of the year was a conference conducted by the Department of Education for the English teachers, supervisors, and administrators of the western section of Virginia. Focused on creative experiences in aesthetics and communications, the conference included nationally known speakers and provided film preview sessions and special sessions for teachers of speech and dramatic arts.

FOREIGN LANGUAGES

Twenty-eight percent of the students in Virginia public secondary schools were enrolled in foreign languages during 1972-73. The growth of Spanish slowed, the downward trend in French and Latin continued, but German attracted additional students. No trend was observable in Russian, second-year Italian was added, and Hebrew was taught for the first time in a Virginia public school. Other details and information are shown in the following tables.

FOREIGN LANGUAGE ENROLLMENT IN
VIRGINIA PUBLIC SECONDARY SCHOOLS, 1966-73

Increasingly, students enrolling in foreign language classes are not necessarily college-bound or academically oriented. More are enrolling because of their interest in learning a foreign language.

Responding to this more heterogeneous shift in student population in foreign language classes, teachers have augmented their efforts to individualize instruction. One example of this trend was a pilot study conducted at Highland Springs High School in Henrico County in which control and experimental groups were compared to secure evidence about the effectiveness of continuous-progress teaching. The most significant result of the study showed that although most of the continuous-progress students completed less course content, they performed equally as well on standardized tests as the students taught by conventional methods.

PERCENTAGE OF STUDENTS STUDYING FOREIGN LANGUAGES,
1962-63-1972-73, IN VIRGINIA PUBLIC SECONDARY SCHOOLS
GRADES 8-12

During the year Foreign Language Service personnel provided leadership in attempting to define individualized instruction as a broad concept which can be achieved in many different ways, not all of which are unique or different from the methods that good teachers have been using for centuries.

To assist teachers in becoming more adept at individualizing instruction, the Foreign Language Service planned a conference on this topic for the summer of 1973.

A new service begun this year was the collection of statistical and related information concerning foreign language offerings in the colleges. The first survey showed that enrollments are beginning to increase again in some colleges which experienced a decline after requirements for foreign languages were eliminated or decreased several years ago.

For the first time a workshop was held for college foreign language methods instructors and others interested in preparing foreign language teachers. The attendance was excellent and a similar program was requested for 1973-74.

The foreign language supervisors consulted with Alexandria public school officials in conducting a pilot study, in which Latin was taught to fifth-grade pupils, to determine its effectiveness in increasing their reading skills.

The Foreign Language Service continues to initiate or to help organize methods, workshops, and courses for teachers. A record number of teachers enrolled for the summer of 1973.

Five additional Latin filmstrips were produced in collaboration with Dr. Gareth W. Schmeling, of the University of Florida. Twenty of these filmstrips are planned, and 14 have been completed.

The twelfth conference for foreign language teachers was held in Fredericksburg. Six hundred teachers from all areas of the State and representing all levels of instruction attended.

The foreign language staff believes that one of the most effective means for improving foreign language instruction is through assisting colleges in improving the preparation of new teachers, and providing leadership for those who already

are in the profession. The supervisors, therefore, devote much time to collaboration and consultation with college foreign language and education staffs.

Each member of the staff attended one national conference during the year. Supervisory personnel assisted teachers and supervisors through classroom visits and school conferences. Other activities included participating on evaluation committees, reviewing films for the Bureau of Teaching Materials, processing of NEA applications, and other routine activities.

Of particular significance is the need for a master's degree program in foreign language education. During the year the foreign language supervisors consulted with several college instructors interested in establishing such a program.

Staff members of the service sought to encourage better coordination among the various professional organizations in the State and to promote more effectively the teaching of foreign languages.

HEALTH, PHYSICAL EDUCATION, SAFETY AND RECREATION

The Health and Physical Education Service provided leadership and assistance in developing and strengthening health education, physical education, and safety education programs in elementary and secondary schools during 1972-73. Staff members visited 85 school divisions, assisted in 15 curriculum development workshops, and conducted 23 physical education workshops. During the year staff members assisted local school personnel in selecting instructional materials, planning outdoor facilities, evaluating plans for health and physical education facilities, and evaluating proposed elective courses for the eleventh and twelfth grades. They also worked with school divisions involved in pilot study programs and helped to evaluate Title III, ESEA, projects.

Much emphasis continues to be placed on drug education. A survey disclosed that the percentage of pupils receiving drug education instruction increased during 1972-73. The greatest level of concentration was in the fifth, sixth, seventh, and eighth grades. The position of supervisor of drug education was added during the year and Miss Jeane L. Bentley, supervisor of health and physical education for the Roanoke City schools, was appointed to this job.

Fifteen regional meetings for principals and guidance counselors were conducted during the fall of 1972 to discuss the schools' role in the drug education program. Work was begun on a drug education information resource guide for teachers. A workshop for college health educators was held in the spring of 1973 to develop a drug education course outline.

An analysis of the summaries of physical defects, deficiencies, and corrections from 1963 to 1972 showed considerable progress in the health screening program. During these 10 years, for example, the total number of pupils inspected increased from 870,324 to 954,216; 25.2 percent of the pupils in 1972 had medical examinations as compared with 14 percent in 1963-64. The number of pupils with one or more defects or deficiencies decreased from 33.7 percent to 26.9 percent, and the number who had corrections made increased from 33.2 percent to 49.9 percent. The number of pupils with eye defects decreased from 17.3 percent to 8.9 percent, and the number having corrections made increased from 27.7 percent to 62.3 percent.

The number of demonstration schools recognized for offering outstanding health and physical education continued to increase. Five schools which were

demonstration schools for three years were placed on the honor roll. Of 31 other schools, 23 were elementary, seven were junior high, and one was a senior high school.

The Health and Physical Education Service planned and conducted a meeting in the fall for supervisors of health and physical education. Two conferences also were held in the spring—one for representatives from colleges and universities, and the other for teachers and supervisors of health, physical education, and/or driver education. Staff members also attended national, district, and State professional meetings.

Two physical education camps, which 236 girls from 66 schools attended, were conducted in June at 4-H Camp Farrar in Virginia Beach. The camps were conducted to provide opportunities for girls to gain a better understanding of physical education, to develop qualities of leadership, to develop an interest in the teaching profession, and to have camping experiences.

In addition to the services rendered to the public schools, staff members assisted colleges and universities in developing or reviewing their professional preparation programs. Staff members also served on visiting committees appointed to evaluate teacher education programs, and spoke to professional classes throughout the State.

Within the Department, personnel of the service cooperated with the Bureau of Teaching Materials in evaluating films, and worked with the Division of Telecommunication in evaluating an ETV series and conducting in-service meetings for the school personnel served by the ETV stations in the State. All staff members served on the Standards of Quality task forces.

HISTORY AND SOCIAL SCIENCE EDUCATION SERVICE

The program of professional services within the History and Social Science Education Service contributes to the improvement of local educational programs in history and the social sciences. Staff members work with supervisors, administrators, and teachers on a consultative basis concerning various aspects of the social studies curriculum. During 1972-73, staff members of the service assisted secondary school personnel by:

- Participating in curriculum planning, selecting instructional material, developing elective courses, and evaluating teaching methods and instructional strategies;

- Conducting local pre-service and in-service activities, demonstration lessons, and curriculum workshops;

- Planning and conducting the annual conference for teachers of history and the social sciences;

- Planning and conducting the annual conference for supervisors of social studies in local school divisions;

- Assisting selected school divisions involved in pilot-study programs and research studies;

- Maintaining a History and Social Science Resource Center which contains research studies, curriculum guides, national curriculum projects in social studies, and professional titles in history, government, geography, economics,

sociology, psychology, and related areas which are available for loan to local school personnel; and

Serving on visiting committees which evaluated secondary social studies programs.

Within the Department, staff members cooperated with the School Libraries and Textbooks Service and the Bureau of Teaching Materials in evaluating instructional materials, and assisted in the administration of National Defense Education Act (NDEA), Title III, funds for instructional materials and equipment to be used in teaching history, civics, and geography. Staff members also participated in research studies and instructional programs relating to environmental-ecological education, economic education, ethnic studies, and social studies education in the schools.

Publications prepared by the service and distributed to school divisions included: *A Guide to Instructional Preparation for Virginia and United States History*; *An Instructional Guide for Virginia and United States Government*; *Curriculum Analysis in History and the Social Sciences*; *Directory of Social Studies Curriculum Projects*; *In-Service Education in History and the Social Sciences*; *Our American Heritage: Documents and Symbols of Democracy*; *The Social Studies Department*; *The Democratic Legacy—Basis for Freedom—A Program of Citizenship Education for Virginia's Public Schools*; *Reflective Questions—Analyzing the Social Studies Program*; *Social Studies Education, Kindergarten Through Grade Twelve*; and *Social Studies Education in Virginia's Public Schools—1870-1970*.

In addition to services rendered to secondary school personnel, staff members attended regional and national professional meetings related to the teaching of history and the social sciences; cooperated with various agencies and organizations such as the Senate Youth Program, Virginia State Chamber of Commerce, Model General Assembly, Virginia Federation of History, Virginia Federation of Women's Clubs, the Virginia Bicentennial Commission; and assisted lay groups interested in history, government, environmental-ecological education, and economic education. They also assisted representatives of colleges engaged in teacher training, and participated in various studies and committees, including the Humanities Development Panel, the executive committee of the Virginia Council for the Social Studies, Junior Historians' Committee of the Association for the Preservation of Virginia Antiquities, and the Virginia Commission on Children and Youth.

STATISTICAL SUMMARY OF HISTORY AND SOCIAL SCIENCE COURSE OFFERINGS IN THE PUBLIC SCHOOLS OF VIRGINIA 1972-73

MATHEMATICS EDUCATION

To provide leadership and guidance to localities and assist them in improving mathematics instruction and curriculum, the Mathematics Education Service emphasized general implications for mathematics education as related to the *Standards of Quality and Objectives for Public Schools in Virginia, 1972-74*. This emphasis came about through the initiative of the staff members and through expressed concerns of local school personnel. Efforts to implement the Standards of Quality and Objectives were manifested in a variety of activities.

The major activities of staff members were consultations with mathematics teachers and with local supervisors and administrators to improve mathematics edu-

cation. These activities included observing and working with teachers individually and in small groups, evaluating mathematics programs, conducting pre-school and in-term conferences for mathematics teachers, assisting with the preparation of local curriculum guides and of instructional materials, and speaking at meetings of and assisting with the operation of mathematics teachers' organizations throughout the State.

Some teachers expressed concern regarding the implementation of the Standards of Quality and Objectives. Most significant among these concerns were means for effecting individualized mathematics programs, the pros and cons of offering Algebra I to eighth-grade pupils, curriculum alternatives for college-bound seniors, considerations in preparing mathematics curriculum guides, the essentials of constructing measuring instruments to evaluate progress of students toward desired goals, the current place of instruction in metric measures within a mathematics program in light of national moves toward metrication, means for stimulating pupil motivation, instructional techniques and curriculum modifications to accommodate low achievers, and the increasing role of mathematics in systematizing the knowledge of the physical, biological, social and medical sciences.

Aspects of the Standards of Quality were emphasized throughout a series of conferences for mathematics teachers, supervisors, and administrators. The keynote address at the Tenth Annual State Mathematics Conference held in Arlington was "Quality Education and Classroom Instruction." Specific aspects of the Standards were dealt with during other sessions at the annual conference, at a regional conference held at Abingdon, and during a series of one-day conferences conducted by staff members in Russell, Buchanan, Scott, and Nottoway Counties and in Roanoke City. Each of the one-day conferences featured a session on the classroom planning and management objective as it related to mathematics instruction.

Current information about mathematics education in other states and useful ideas from educational leaders throughout the nation were gained through participation in national activities. One or more staff members served in the following capacities: member of the planning committee for Assessment Programs in Mathematics Conference; president and past-president of the Association of State Supervisors of Mathematics; speakers at regional and annual meetings of the National Council of Teachers of Mathematics; member of program committee for the annual meeting of the National Council of Teachers of Mathematics. Additional ideas were gained on the international level through participation by several staff members in the International Congress of Mathematics Education, Exeter, England.

General aspects of secondary education as well as mathematics were given attention by staff members. They participated in regional, district, and Statewide meetings of superintendents, principals, and supervisors; served as coordinators for and members of visiting committees to evaluate junior high schools, senior high schools, and colleges; and served as leaders and members of Standards of Quality and Objectives district teams.

MUSIC EDUCATION

The Music Education Service provided leadership during the year by engaging in field services at secondary and elementary schools in 84 divisions, participating as team members for school evaluations, conducting a two-day seminar for music

supervisors, and directing the Virginia Music Camp for 816 student participants and 164 teachers. The service did not organize a State music conference because of a convention in Norfolk sponsored by the Music Educators National Conference, Southern Division. All four members of the professional staff attended the convention, and one was asked to present a work session on "Music for Special Education."

Approximately 1,500 music teachers were employed in Virginia schools last year. This represents no change from the previous year. The number teaching music in county elementary schools was somewhat larger whereas the number working in city systems decreased.

Requests continued to be received for approval of non-performance type courses such as music literature, music theory, and humanities. There was an increasing number of junior high and middle schools requesting approval for the addition of so-called exploratory or mini-courses in music. Also, a few schools are interested in adding courses in guitar and handbells. It should be noted that there is an increasing number of schools which are including small ensembles within the daily schedule, possibly the result of busing which makes it difficult for larger groups to meet during out-of-school hours. More interest is being expressed in music in early childhood education due to an increase in the number of kindergartens.

There was a larger number of requests last year for assistance in individualizing music instruction and teaching music in open space schools. Interest continues to be shown in the multi-discipline workshop, "Communication in Space," which is a cooperative venture of the Art, Music, and Health and Physical Education Services, and the Division of Elementary Education.

Much staff time is devoted to reviewing blueprints of local building plans. A larger number of suggestions are being adopted by superintendents and architects.

Two additional trends might be noted: a larger number of local music guides are using behavioral objectives to set forth expected outcomes; and an increasing number of people, some from considerable distance, are using the extensive recording and book collections available in the service offices. These trends appear to be based upon concern with accountability and meeting the Standards of Quality.

The first music research project was approved for State funding by the Division of Educational Research and Statistics. It deals with keyboard instruction for the culturally deprived. This service assisted Montgomery County in developing the project.

NATIONAL DEFENSE EDUCATION ACT

In past years federal funds under Title III of the National Defense Education Act of 1958 have been made available to local school divisions on a matching basis for the acquisition of certain types of equipment and/or materials to be used in specific subject areas. Federal funds also have been provided on a matching basis for the State administration of this program.

In approving project applications from school divisions, the primary concern of the State Department of Education has been that the equipment and materials secured under the NDEA, Title III, program be used to strengthen instruction in science, mathematics, modern foreign languages, history, civics, geography, English, reading, and industrial arts. To achieve this goal, each project application has been accompanied by a plan stating the need for the requested aids, and indicating

how the items would be used to improve instruction in the subject for which the request was made.

State supervisors from each academic area have participated in the approval and evaluation of these projects and have assisted school divisions in strengthening instruction through the wise use of available funds.

Federal funds for the acquisition of equipment by school divisions under Title III of NDEA were not made available for 1972-73 with the exception of those funds carried over from 1971-72. However, Virginia received funds for the administration of the program during the current year.

Future federal funding of NDEA, Title III, is contingent upon the actions of Congress and the administration.

SCIENCE EDUCATION

Enrollment in science courses for the 1972-73 school session totaled 310,078 students in grades 7 through 12—an increase of 6,103 students from 1971-72. Of the 3,575 science teachers, 294 were teaching one or more science courses without proper endorsement.

Approximately 500 secondary science teachers, college personnel, and school administrators participated in an environmental/ecological education workshop at the Tenth Annual State Science Teachers' Conference sponsored by the Science Service held in Roanoke on October 13 and 14, 1972. Environmental science education materials used in the Tenth Annual State Science Teachers Conference were prepared and distributed to 450 schools, a unit on the honeybee was prepared for distribution to biology teachers, and a tentative physics guide has been prepared for a committee review.

The supervisor of science served on three national committees—as executive secretary for the Council of State Science Supervisors; the advisory committee for the National Junior Science and Humanities Symposium, sponsored by the United States Army Research and Development Office; and the advisory committee for the Minority Engineering Education Effort Task Force, sponsored by the Engineer's Council for Professional Development. He also served as State recruiter for the Youth Conservation Corps program, sponsored by the U. S. Forest Service. Twenty-two students, ages 15 to 18, from 17 cities and counties, were selected from 200 Youth Conservation Corps applications to participate in the environmental work-study program which was held at the Jefferson National Forest, Wise, Virginia, June 10 through August 4, and two students were selected to participate in the Eleventh Annual West Virginia National Science Youth Camp. The National Aeronautics and Space Administration Spacemobile Program was scheduled for 14 Virginia schools during the year by the supervisor of science.

The Science Education Service staff members assisted local school divisions throughout the year in improving science instruction by serving as consultants to local school personnel in preschool and in-service workshops. Eighty-one visits to school divisions were made by staff members during the year. Staff members attended the annual meeting of the Council of State Science Supervisors on the Data Utilization in Assessing the Needs of Science Education in the States the National Science Teachers Annual Meeting; and the Energy Crisis and the Environment, Pennsylvania State University, sponsored by the Atomic Energy Commission.

Thirty-one school divisions have purchased the "Science Laboratory Safety Film—Part I" in their continued effort to promote laboratory safety. Staff members are revising the publication "Pin-Up For Safety."

Ten workshops in science laboratory safety and environmental science education were conducted during the year. Twenty school divisions were assisted with the implementation of the Standards of Quality.

---------------------------	----------

DIVISION OF SPECIAL EDUCATION

The Division of Special Education is committed to provide leadership and consultation to local school divisions in their programs for exceptional children. The division also is responsible for the administration of all State and federal funds appropriated for the education of handicapped children. The programs of instruction and services for exceptional children range from those for the severely handicapped to the gifted. Special services are provided for children who are emotionally disturbed, physically handicapped, have a speech or hearing impairment, are mentally retarded, have an extreme learning problem that is not associated with mental retardation, or a combination of one or more of these conditions. Services also are extended to children who are unable to attend school and require instruction at home or in hospitals.

During 1972-73, special education services were extended to 49,720 handicapped children in Virginia public schools. These services included instruction, special assistance, and supportive services in regular education programs, in special classes, in special schools, at home, and in hospitals.

Legislation enacted by the 1972 session of the Virginia General Assembly requires a program of special education for all handicapped children, ages 2-21, in the Commonwealth. In addition, Standards of Quality adopted by the Board of Education and by the General Assembly require the identification by local school divisions of all exceptional children and the development of acceptable plans for their education. Initial plans were submitted projecting the expansion of each school division's program over a five-year period. Updated reports will be submitted annually.

Local special education advisory committees have been established to work with each school board to promote better understanding and acceptance of the programs in accordance with the standards established by the State Board of Education, and each local school board has certified the adoption of a policy for the operation of special education programs.

Special Education Instructional Programs

Programs for the Mentally Retarded. The number of mentally retarded pupils enrolled in special education programs during the 1972-73 school year totals 19,328. Of this number, 15,889 educable mentally retarded pupils were instructed by 1,137 teachers using resource and self-contained models with emphasis on individualized instruction. In addition, 3,439 trainable mentally retarded pupils were served by 238 teachers and 136 attendants.

A Guide for Curriculum Development for Teachers of Trainable Mentally Retarded Children was completed and distributed to all school divisions in the State and all state special education departments in the United States.

In addition to continued growth in the number of classes and special pilot projects, progress has been made in vocational education for the retarded. Thirty-two vocational education and special education projects were funded to serve approximately 1,000 educable mentally retarded pupils in vocational and pre-vocational instruction.

*Not included in total.

(1) This total is distributed among the several areas of exceptionality.

Programs for the Learning Disabled. There was continued growth in teacher-training opportunities and in the number of programs offered for pupils with learning disabilities. The number of pupils enrolled in learning disability

programs totaled 5,679, an increase of 3,240 over the previous school year. These pupils were served by 117 teachers in resource, transitional, itinerant, and special classes. Regional diagnostic centers also provided services for learning disabled pupils.

Programs for the Emotionally Disturbed. Instruction provided in regular classrooms for 1,996 emotionally disturbed pupils was supplemented by time spent in resource rooms, special classes, special schools, and treatment centers. One hundred and one teachers were employed and supportive services were provided for emotionally disturbed children in school divisions on an individual and regional basis.

Programs for the Speech Impaired. School divisions throughout the State provided speech therapy to 18,286 pupils with speech handicaps. Local school divisions reported the employment of 236 speech pathologists for the school year 1972-73.

Programs for the Hearing Impaired. Hearing tests were administered by audiometric technicians, hearing therapists, and other trained persons to determine significant hearing impairments. Programs and services were provided for 1,283 hearing-impaired pupils in individual school divisions as well as on a regional basis.

Institutional and Related Programs

Homebound Instruction. Home instruction is designed for children who are unable to attend school because of physical disabilities, disease, emotional disorders, congenital deformities, or pregnancy. During the school year 1972-73, 4,199 children received home instruction. The teacher assigned to the homebound child functions as a link between the child and his class at school. The teacher of the homebound pupil and the regular classroom teacher are involved in providing the best education possible for the child and in planning his return to class as quickly as possible. Some children, due to the nature of their disabilities, receive instruction at home during their entire school career. During the year 1,966 teachers were employed in this program.

Instruction of Pupils in Hospitals. Hospital teaching is a little-known aspect of the special education program. This service, which began in 1938 with four teachers, has grown to include 57 teachers who served 3,802 pupils during 1972-73. Through a cooperative agreement involving the hospital, the school division, and the Division of Special Education, the school division employs the person who is assigned to a teaching position in the hospital. Full State reimbursement is provided to the school division for each teacher employed.

Personnel from the Division of Special Education and the school division share the responsibility for supervising the program. Although teachers are still needed to help pupils who must have long-term care in hospitals, the trend continues to be toward reduced periods of hospitalization followed by a closely monitored recuperation period at home. In accordance with this trend, the hospital instruction program is becoming more of a diagnostic service with increased emphasis upon communication with local school divisions to meet the educational needs of the pupils.

Tuition Assistance for the Handicapped. For the 1972-73 school year all previous tuition programs for handicapped pupils were combined into one program. School divisions received applications, determined a student's eligibility, and reimbursed the parent or guardian on a percentage formula when the child attended an approved private, nonsectarian school for the handicapped.

The responsibility for approving private, nonsectarian schools for the handicapped for tuition assistance for both in-State and out-of-State schools is assigned the Division of Special Education. Ninety-two out-of-State and 76 in-State schools were considered for approval.

Additionally, school divisions received reimbursement on payments made to parents of eligible children. A total of 1,907 handicapped pupils were served in the following four categories:

Preschool age children in local school divisions	72
Pupils enrolled in other school divisions	173
Private nonsectarian schools	1,486
Private nonsectarian schools (contracted)	176
Total.....	<hr/> 1,907

Clinic Educational Consultants. Educational consultants continued to function in clinics serving children throughout the State. These positions were established to provide the following services to handicapped children: (1) to add an educational component to clinic evaluation, and (2) to provide a channel of communication between schools and clinics. As a liaison agent, the educational consultant secures information from the school regarding the pupil's educational status and adjustment. By adding this component to the clinic team's findings, the consultant augments information which is used in working cooperatively with school administrators and pupil personnel services in determining placement and remediation strategies.

This venture is coordinated with the State Department of Health and local school divisions.

Ancillary Programs

Visiting Teacher Services. Visiting teachers supplement classroom teacher instruction and work cooperatively with other school personnel. They provide case work service for the child and his family by serving as consultants to teachers and other school personnel. Visiting teachers are concerned with personality problems, school failure, irregular attendance, and other obstacles that hamper a child's educational achievement. During the year 279 visiting teachers were employed by local school divisions.

School Psychological Services. School psychologists serve as members of teams of professionals who are involved in the identification and evaluation of exceptional children. The psychologist's role involves concern for each disturbed child, developing programs to prevent mental health problems, staff consultation services, and research. School psychologists are concerned with seeing that children function in an educational climate that will assure that their achievement is com-

mensurate with ability. School divisions employed 153 school psychologists during the year.

Regional Services. Three assistant supervisors were employed as regional coordinators during the year. This program was inaugurated in an effort to provide greater assistance to school divisions and to supplement the activities of program specialists who operate out of the Richmond offices of the Division of Special Education. These coordinators help plan divisional and regional programs and work with classroom teachers and other personnel in school divisions in the regions to which they are assigned.

Special Projects for the Handicapped

Title VI-B, Public Law 91-230 (formerly Title VI-A, Public Law 89-10). Virginia's allocation from Title VI B funds totaled \$722,173 for 1972-73 and was used to finance 34 projects to improve services for handicapped pupils. The 34 projects, which involved 63 school divisions, included educational activities and psychological, diagnostic services for handicapped pupils and projects to develop curriculum material and plan strategies for regional, cooperative programs.

Title VI-C, Public Law 91-230. The State Department of Education is participating in a regional program involving five states and the District of Columbia which is designed to provide educational services to children who are deaf and blind. During the year an annual residential school program was begun at the Virginia School at Hampton for nine deaf-blind children, and a 12-month program was instituted in the Arlington public school system for four deaf-blind children. A program was held for the second summer at the Virginia School at Hampton to provide educational services to deaf-blind children.

In a cooperative effort between the Department of Education and the Department of Mental Health and Mental Retardation, a team of specialists screened and diagnosed deaf-blind residents at the Lynchburg Training School and Hospital and the Petersburg Training School and Hospital. This effort may culminate in the establishment of a program for deaf-blind, retarded persons. Forty-two children in Virginia have been identified as deaf-blind.

Title VI-D, Public Law 91-230. This federal grant program provides funds to prepare professional personnel for the education of handicapped pupils. During 1972-73, \$138,822 was allocated to Virginia to grant full summer-session and academic-year traineeships to teachers on a competitive basis. Ninety summer traineeships and six full academic year traineeships were awarded.

Title VI-G, Public Law 91-230. The State Department of Education was selected as one of 23 states to pilot a program for learning disabled children under provisions of Public Law 91-230, Title VI-G. The Title VI-G project provided model classes to demonstrate suitable programs for learning disabled pupils. The project served 45 pupils through a transition, self-contained first grade and resource class at the elementary and junior high levels. The classes demonstrated types of programs needed by learning disabled pupils, as well as procedures and methods of instruction necessary for class organization for the successful development of learning disabilities programs. Visits to these classes by representatives from many school divisions stimulated development of other classes through-

out the State. Each division in which one of the project classes was located added, or will add in the next school year, similar classes for learning disabled pupils.

Title VI-G was initiated with the development of three model classes. Pupils were identified and diagnosed, and were provided an individualized program of instruction. The classes provided direct service to the pupils identified and also offered a resource and information center for professionals.

The project staff participated in conferences and meetings with various organizations to discuss the project and promote better understanding of learning disabilities. Included were conferences sponsored by the National Association for Children with Learning Disabilities, the Virginia Association for Children with Learning Disabilities, and the Virginia Association for Children with Learning Disabilities in cooperation with the Virginia Council on Health and Medical Care.

A pamphlet describing the project and a slide presentation showing of the class in operation were prepared for distribution.

Research results for the first year were compiled and a written report was prepared.

Public Law 89-313. This program is designed to improve and expand the educational programs for handicapped pupils in State-operated schools and hospitals. During 1972-73 a total of \$726,105 was allocated to be used in 15 State schools and hospitals. Projects included preschool education in the Lynchburg Training School and Hospital and in the Petersburg Training School and Hospital; a program for deaf-blind pupils at the Virginia School at Hampton; increased evaluative services at the Virginia Treatment Center for Children; a program of arts and crafts for tubercular patients at the Blue Ridge Sanatorium; a summer program at the Medical College of Virginia; enrichment activities for patients at the Western State Hospital; coordination of educational programs at Eastern State Hospital and the University of Virginia Hospital; an intensive remedial reading program for pupils at the Woodrow Wilson Rehabilitation Center; and work-study programs for deaf and blind pupils at Virginia School for the Deaf and the Blind. Educational consultants were placed in two child neurology clinics, one child evaluation clinic, and in the Handicapped Children's Clinic, University of Virginia Hospital.

THE VIRGINIA SCHOOL AT HAMPTON

The Virginia School at Hampton was established in 1906 by an act of the Virginia General Assembly to train children who have hearing and visual impairments.

Special education programs at the Virginia School at Hampton are designed to meet the unique and special needs of the handicapped children served. In these programs efforts are made to create a responsive learning and living environment that is concerned with the development of the total child. The following are essential to the maximum efficiency of the total program of the school: preschool training; academic programs for students in elementary through the high school grades; and appropriate vocational training. Adequate facilities, personnel, and equipment also are necessary to provide a "living and learning"

environment which will stimulate students to achieve to the best of their abilities in academic and vocational fields.

THE VIRGINIA SCHOOL FOR THE DEAF AND THE BLIND

A major improvement in the educational program of the Department for the Deaf resulted from the installation of closed-circuit educational television and employment of a trained media specialist to work with the staff. The project was financed with federal funds available through provisions of Public Law 89-313.

The choral program in the School for the Deaf was expanded during the year to provide additional training and experience for the students enrolled.

Students in elementary and secondary grades in the School for the Deaf and the School for the Blind participated in educational field trips during the year.

DIVISION OF VOCATIONAL EDUCATION

The Division of Vocational Education has provided services for school divisions in the development of effective and quality vocational programs as an integral part of the total curriculum. During 1972-73 the division assisted local school divisions in assessing their programs of vocational education and in developing one- and five-year plans required by the Standards of Quality. Local divisions continue to provide broader and more flexible programs which are geared to the needs of the individual and to society. These programs contribute to a wholesome economy, satisfactory employment, and to a higher standard of living.

Continued emphasis has been placed on increasing the number of professional personnel participating in pre-service and in-service activities for improving the quality of instruction. The division continues to aid in updating the content of teacher education programs and in curriculum development for vocational education. More teachers are being trained for special and innovative vocational programs. These include explorations and orientation programs, programs in occupational home economics, special cooperative programs, off-farm related programs, and cluster programs for the skilled trades.

New vocational facilities have provided opportunities for occupational training and retraining for many more youth and adults throughout the State.

Because of social, economic, and technological developments, it is essential that more people be equipped with skills needed for employment. Employers will continue to require more specialized training for a higher percentage of their employees.

Reports of the activities of the services of the Division of Vocational Education for 1972-73 follow in this order: Agricultural Education, Business Education, Distributive Education, Fire Service Training, Home Economics Education, Industrial Arts Education, Manpower Training, School Food, Trade and Industrial Education, Veterans Education, Construction, and Vocational Education Research and Statistical Information.

AGRICULTURAL EDUCATION

The Agricultural Education Service provides leadership for the development and improvement of all phases of vocational education in agriculture, including programs for high school students and young and adult farmer groups and other agribusiness programs. The general objective of these programs is to provide basic instruction for agricultural occupations and to develop agricultural competencies needed by individuals engaged in, or preparing to engage in, on-farm and off-farm agricultural occupations.

Therefore, the primary function of the service is to assist school administrators and teachers in planning, developing, and improving the instructional program in agricultural education based on the needs of students. Assistance was given by the staff through observation, discussion, on-farm and job instruction, evaluation of local programs, group conferences, in-service training programs, and correspondence, and other appropriate means. The staff, in cooperation with teacher education institutions, prepares instructional materials and curriculum guides for use by teachers of agricultural education, conducts research, and assists in planning and conducting in-service and teacher education programs.

During the year, major emphasis was placed on implementing the basic and optional courses in agricultural education in terms of Standards of Quality and Objectives and as outlined in curriculum guides. The optional courses included agricultural production, agricultural machinery service, agricultural business, natural resources management, and ornamental horticulture. During 1972-73, 117 developmental programs emphasizing one of the four options other than production agriculture were conducted. Further emphasis was given to the placement of students for supervised, occupational experience in agriculture and to the evaluation of local programs in agricultural education. Implementation of instructional programs for disadvantaged students was emphasized, and the curriculum guide for Natural Resources Management was revised and distributed.

In 1972-73 the staff provided professional services to 201 high schools in 85 counties and six cities offering agricultural education programs. In these schools 21,404 high school students were enrolled in regular agricultural education classes, including 2,643 in general mechanics classes, and 1,039 in special classes for disadvantaged students. In addition, 2,030 out-of-school youth were enrolled in 101 young farmer classes and 6,845 farm men and women were enrolled in 235 evening classes devoted to the discussion of production, conservation, marketing of farm products, and farm-management problems. Adult agricultural mechanics classes offered instruction in the selection, operation, preventive maintenance, repair, and construction of farm machinery. During 1972-73, 17,094 persons participated in 50 school community cannery programs devoted to the production and conservation of foods for family consumption. This is a joint activity of the Home Economics and Agricultural Education Services.

Staff personnel worked closely with division superintendents, high school principals, and teachers of vocational agriculture. Five schools provided new facilities or erected greenhouse facilities for teaching ornamental horticulture. The results of developmental programs and studies conducted last year continued to provide important guidelines for the staff, local school officials, and teachers in continuing their redirection and reorientation of agricultural education to meet the current needs of youth and adults.

High School Students. During 1972-73, 6,896 high school students received occupational experience through supervised farming programs, 4,709 were enrolled in placement on farms and in off-farm agricultural businesses for occupational experiences, and 3,839 students received occupational experiences primarily in school facilities such as agricultural mechanics shops and greenhouses. The total income for these students was \$6,879,357. Continued efforts were made to encourage close coordination between agricultural education departments in intermediate and junior high schools and departments in senior high schools.

Future Farmers of America. The staff provided guidance for the Future Farmers of America (FFA), a national organization of students studying agricultural education in high schools. Membership in 196 FFA chapters in Virginia totaled 15,848, and more than 1,000 members attended the FFA Convention at Virginia Polytechnic Institute and State University.

In cooperation with the Home Economics Education Service, the staff provided guidance and leadership in conducting the FFA-FHA Camp at Morgart's Beach and the J. R. Thomas Camp near Petersburg. During the summer of 1972-73, 870 boys and girls attended these camps, which provided leadership training and

recreation. A Statewide series of workshops was conducted to update the FFA program.

Young Farmer Classes. A total of 2,030 young farmers were enrolled in 101 classes. The staff provided guidance for the Statewide program which is designed to assist young farmers in becoming better established in the business of farming and to help them keep abreast of the many changes in farm technology. The Young Farmer Convention was held in February in conjunction with the meeting of the Young Homemakers of Virginia. More than 500 young farmers and their wives discussed common problems and made plans to expand and improve the Young Farmer and Young Homemaker training programs. Instruction in all phases of farm management and agricultural mechanics was emphasized during the year.

Farm Families. A total of 6,845 adult farmers received an average of 59 hours of class instruction in evening classes and an average of two on-farm instruction visits during the year. Farmers enrolled in agricultural mechanics classes also repaired, overhauled, and/or constructed farm equipment.

Participation in the food production and conservation program was supervised by the cooperative efforts of the staff and teachers of agricultural education and home economics. In school community canneries the equivalent of 1,712,691 pints of food was processed by persons receiving instruction in the preservation of food for family consumption.

Conferences, Workshops, and Other Activities. During the year the Agricultural Education Service assumed leadership in conducting a number of State, area, and group conferences to assist localities in providing in-service training for agricultural education teachers. "Implementing the Virginia Standards for Quality Education Through Agricultural Education" was the theme of a Statewide conference held at Virginia Polytechnic Institute and State University in July. The staff also helped plan and conduct 156 State, area, and group conferences for agricultural education teachers.

* School-community canneries.

† Part-time teachers.

‡ Enrollment served jointly by agriculture and home economics teachers and shown also in the Home Economics Education report.

NOTE: Six cities and 85 counties were served by the State program of Agricultural Education.

In cooperation with the teacher education staffs at VPI & SU and Virginia State College, the Agricultural Education Service conducted in-service training programs with emphasis on program planning, agricultural mechanics, farm electrification, agricultural business, conservation and forestry, mechanized timber harvesting, and ornamental horticulture. A series of workshops conducted throughout the State was devoted to farm and home wiring. Staff assistance also was given in developing lists of curriculum materials and equipment needed for teaching agricultural education, planning agricultural education programs in urban areas where increasing numbers are being requested, and implementing standards and guidelines for young and adult farmer programs. An *Instructional Manual for Continuing Education in Agriculture* was published and distributed.

In cooperation with VPI and SU a follow-up study was conducted based upon the "Content Use Inventory" to determine the extent to which the content of agricultural education courses is being used in employment.

BUSINESS EDUCATION

The Business Education Service is concerned with achieving two major goals of business and office occupations education: (1) the vocational knowledge, skills, and attitudes needed by youths and adults for employment and advancement in business careers; and (2) the knowledge, understanding, and non-vocational skills needed by all persons in everyday contact with business and economic activities. The major function of the service is to improve instruction in business and office occupations education for secondary, adult, and teacher education.

Instructional programs have been revised to offer student-oriented vocational programs centered around job clusters, such as secretarial, stenographic, and related occupations; typewriting and related occupations; data processing occupations; clerical accounting occupations; filing, office machine operator, and general clerical occupations.

Block-time programs were started in 17 high schools in the 1968-69 school year. The job-centered programs employ integrated instructional units and office simulations as instructional methods. By 1972-73, the fifth year of this curriculum revision, 194 high schools in 94 school divisions had instituted 401 block-time programs as follows: 83, business data processing; 121, stenography; 147, clerk-typist; 19, clerical accounting; one, office procedures; 24, office services (disadvantaged youth); and six, medical office procedures. One hundred twenty-eight of these block programs incorporated work-training. Eighty-four percent of the cooperative education programs are through the block programs.

Reimbursement from federal and State funds on a matching basis with local funds was used to purchase instructional equipment for approved programs for office occupations education. One hundred twenty-eight schools in 69 divisions and one special school participated in these funds during past school year.

Secondary School Program. During 1972-73, 1,451 teachers taught business subjects in 280 high schools, 13 vocational centers, 71 junior high schools, and two schools for the deaf and blind. In the 366 schools, 138,068 students were enrolled in 37 courses. A count of students through the vocational education reporting system showed 69,503 enrolled in a vocational curriculum in grades 9-12. There were 680 equated full-time reimbursable teaching positions. Of these 274 received salary reimbursement through vocational education funds. There were

13 full-time and two part-time local business education supervisors in the State. Of 280 high schools, 270 had at least one vocational program for a cluster of office occupations.

Cooperative Education (VOT-COE)

One hundred eighteen high schools had 152 cooperative work-training programs; 24 of these were Vocational Office Training programs and 128 were in block programs. There were 2,863 students enrolled, an increase of 298 over the previous year. The total earnings of cooperative students (2,781 reporting) for the year amounted to \$3,671,823, and averaged \$1,320 per student.

Conferences, Workshops, Services. Five area one-day conferences attended by 215 teachers were held to discuss effective techniques for basic business education. Teacher educators assisted with each of the presentations. Four of the conferences were sponsored jointly by the State staff and teacher-education institutions.

One in-service workshop enrolling 79 block-time teachers was held. Regular meetings of COE coordinators were conducted during the year in 10 geographical areas to discuss their projects and to coordinate plans and activities. The annual Business Education Conference, which was held in August 1972, was attended by 349 persons, 26 of whom attended a two-day pre-session for new COE coordinators.

Two conferences for teacher educators and the State staff were held to review needs for in-service and pre-service teacher education for the block-time programs. State standards for teacher certification were developed.

Two conferences, focused on local problems and the need for continued curriculum development, were held for the State staff and for local business education supervisors.

FBLA. There were 175 active chapters of the Virginia Chapter, Future Business Leaders of America (FBLA) with a membership of 6,076. Six regional planning meetings were held in the fall; six regional meetings and the 23rd Annual State Leadership Conference were held in the spring. A Summer Leadership Training Conference was held for one week to assist State, regional, and local officers and advisers with their duties and responsibilities and to plan their work for the year. The State project *HELP* (Health Education Leads to Progress) resulted in \$16,000 being presented to the Virginia Chapter of the March of Dimes.

Post-High School Programs. One State college and one post-secondary school employing 26 teachers offered programs of less than college level. These schools had 316 students enrolled as follows: data processing, 42; secretarial, 95; clerical, 12; accounting, 24; and clerk-typist, 143.

Programs for the Handicapped. Well-defined programs for the handicapped at the post high school level were offered at the Woodrow Wilson Rehabilitation Center, which employed six teachers and one supervisor for 215 students enrolled.

Thirty-two students were enrolled in programs for the deaf and the blind at the Virginia School at Hampton. The program for the blind provides training for typists and machine transcriptionists, and the program for the deaf trains typists and keypunch operators.

A clerk-typist certificate program was offered at the State Farm for Women. Thirteen women completed the program this year. A general clerk program was offered at the State Penitentiary.

Adult Programs. Sixty-five high schools in 27 school divisions and two colleges enrolled 10,776 adults in 634 evening classes; included in this total were 206 adults who were enrolled in special programs for the disadvantaged. Three school divisions offered daytime adult programs for unemployed persons. One division offered accounting, general office, and clerk-typist classes in cooperation with the federal Work Incentive (WIN) program for 143 disadvantaged adults.

CONSTRUCTION OF VOCATIONAL FACILITIES

The first construction of vocational education facilities was started during 1964-65 with funds made available under the Vocational Education Act of 1963.

This act describes an area vocational school as one which offers five or more occupational programs for full-time students. To be eligible for aid, a construction project must provide facilities for five or more occupational offerings which will be located in one school. Such a facility can be the vocational department of a comprehensive high school, a separate vocational education center serving the students from one or more high schools, or a school offering post-secondary vocational and technical training.

These vocational facilities should be available after school hours for classes for persons who have already entered the labor market and who need training to achieve stability or advancement in employment.

These construction projects also may include vocational facilities for youth who are potential dropouts and who are not able to compete in regular vocational programs for junior and senior high school students.

National and local studies show that the majority of high school students enter the labor market when they leave high school as dropouts or as graduates. To be prepared to compete for available jobs, it is important that these young persons have the opportunity to secure vocational training in high school.

The vocational staff assists local school administrators in planning job opportunity surveys and student interest surveys to secure the information used in selecting the occupational training programs to be located in a proposed building, assists localities in determining the space requirements for each training program, reviews the equipment arrangements that are developed by the architect, and cooperates with the School Building Service in evaluating the functional aspects of building plans and specifications.

During 1972-73, five construction projects were started and three more projects were planned for the Appalachian Region. Financing for these Appalachian projects is estimated to cost \$1,700,000, which has been approved by the Appalachian Regional Commission.

TABLE 10—VOCATIONAL EDUCATION CONSTRUCTION PROJECTS

Number of Projects Started	Training Stations Provided	Expendi- tures
58	17,465	\$40,957,768*

* Of this expenditure \$9,152,444 was from Appalachian Act Funds.

DISTRIBUTIVE EDUCATION 1972-73

The staff of the Distributive Education Service assists school administrators, distributive education teachers, and college personnel in developing DE programs and activities to achieve the following goals: (1) to prepare in-school youth for successful employment and careers in distribution; (2) to provide post-secondary programs to meet the demand for junior executives and specialty salesmen in retail, wholesale, and service fields; (3) to provide adult training programs for full-time workers in distribution and for those desiring full-time employment in this field; (4) to provide pre-service teacher education programs to meet the increasing demand for new distributive education teachers each year and to offer in-service professional development activities for teachers already in the program; and (5) to provide research activities, curriculum development, and other auxiliary services for program improvement and evaluation. In meeting these goals, the staff of the Distributive Education Service provided professional services to 361 local DE teachers and supervisors in 200 high schools, 21 middle or intermediate schools, one elementary school, and four vocational centers in 88 school divisions. These services included: planning conferences with school administrators; individual visits with teachers; in-service workshops and conferences; participation in preschool conferences; and evaluation of programs.

The following accomplishments were made during 1972-73 in preparing youth and adults for careers in retail, wholesale, and service-related businesses.

In-School Distributive Education Program

A follow-up study of 1972 graduates of the high school DE program revealed that 61 percent were available for employment, 67 percent of this number were employed full-time in the field of distribution for which they were trained, and 24 percent were continuing their education at a higher level.

During the year, 16,174 students were enrolled in the in-school DE program, grades six through 12, an increase of 13 percent over the 14,105 enrolled in 1971-72.

Enrollments again increased in specially designed DE programs to serve disadvantaged youth, usually identified as potential dropouts. Fifty programs were conducted in 31 rural communities and inner cities, with a beginning enrollment of 1,836 students, an increase of 29 percent over the 1,418 enrolled during the previous year.

Twelve special cooperative DE programs in which 186 students were enrolled were operated on an alternate week, evening, or day basis. Most of these programs consisted of two groups of students who alternated with each other on the job and in school.

The new DE program for grades six through nine was continued and expanded to assist 2,050 students—913 more than were enrolled last year—in planning employment and career goals.

Virginia is one of 14 states conducting an experimental cooperative program in conjunction with the federal and state departments of labor. The purpose of the program is to experiment with the placement of 14- and 15-year-old disadvantaged students in certain jobs under supervision to determine needed changes in labor laws for minors. A follow-up study of personal qualities developed by the program included improvements in students' morale, personal grooming, cooperation with teachers and other students, and greater initiative in school work. On-the-job improvements were noted in neatness, courtesy, attendance, the ability to follow directions, and completion of assigned tasks. Absences and tardiness by these students decreased significantly as compared with the control group not enrolled in the program. Eight programs were operated in seven school divisions with 145 students enrolled.

The special course option in Fashion Merchandising was expanded to include 22 programs with an enrollment of 434, students—an increase of 93 students and seven programs in the State.

Enrollments in other special course options, including Marketing, Food Distribution, and Petroleum Marketing, increased from 250 to 311.

Distributive Education Adult Program

The adult phase of the Distributive Education program again trained almost half of the total adults served through vocational education in Virginia. During 1972-73, 29,452 persons were enrolled in preparatory and supplementary training on management, supervisory, and employee levels.

The most significant enrollment increases occurred in shoplifting prevention clinics, small business management institutes, hospitality training (including hotel-motel, restaurant, and travel attractions), pre-employment training for unemployed persons, real estate, and checker-cashier training.

A total of 510 part-time instructors from business and industry taught DE classes during the year. Instruction time in classes and diploma programs totaled 411,188 man-hours and averaged 10.6 hours of instruction per enrollee.

The 50-hour pre-employment program for welfare mothers was offered in many more communities in cooperation with local welfare departments. Coordinators of these programs had excellent success in placing enrollees in jobs following the training.

Transition training programs in hotel-motel management for veterans of the U.S. Army and U.S. Air Force were conducted at Fort Belvoir and

Langley Air Force Base in cooperation with the Department of Defense. More than 1,140 hours of instruction were given to 200 servicemen and servicewomen, including placement in management positions in the hotel-motel industry in the State.

Teacher Education, Curriculum Development, and Research in Distribution Education

Enrollments in pre-service teacher education programs at Old Dominion University, Virginia Commonwealth University, and Virginia Polytechnic Institute and State University totaled 231 students.

Changes in course offerings and program operation which occurred in the three teacher education programs included: specialized training for coordinators teaching the Education for Employment course in junior high programs; the use of the micro-teaching experience method; and individualized student teaching experiences through participation in the Cooperative Urban Teacher Education (CUTE) program.

Members of the DE staff and teacher educators from the colleges conducted 100 in-service workshops and conferences for 383 local DE personnel to provide opportunities for professional growth, leadership development, and improved job performance.

Research and demonstration projects conducted included: (1) A follow-up study of DE exploratory programs offered in grades seven, eight, and nine (1968-72); field testing individualized learning activity packages (COMPACS) in the selling and advertising areas of the curriculum; a study to determine perceived needs for in-service education of Virginia's distributive education professional personnel; and final evaluation of services and management systems in the Learning Resources Center.

A new curriculum guide for advertising was developed and distributed to DE personnel.

DE adult guidelines were developed for courses in Real Estate Sales and Listings Techniques and Real Estate Finance.

A job preparation curriculum guide, *You're Hired! Getting the Right Job for You*, was developed and is being field tested with exploratory and regular programs.

A color concepts kit to supplement the Visual Merchandising curriculum guide was developed and field tested.

Research was conducted and a booklet is being prepared on environmental simulation as a method of instruction in vocational education.

Distributive Education Clubs of America (DECA)

Virginia was one of the founders of this professional youth organization for DE students and continues to operate as one of the largest and strongest State associations in the nation. With a membership of more than 11,700, Virginia DECA moved to expand the Junior Collegiate Division by adding community college chapters. A program also was initiated to organize an active alumni division for the Virginia organization. Newly elected local DE personnel began serving on the board of trustees and policy and planning committee.

TABLE 11—SUMMARY OF WORK IN DISTRIBUTIVE EDUCATION

IN-SCHOOL PROGRAM					ADULT PROGRAM			TOTAL ENROLLMENT
SESSION	Number of Coordinators	Number of Schools	Enrollment	Earnings Part-Time Cooperative	Number of Teachers	Number of Schools	Enrollment	
1962-63.....	120	107	2,907	\$ 1,968,459	355	104	11,970	14,877

FIRE SERVICE TRAINING

Fire Service Training coordinates and supervises training programs for 566 paid and volunteer fire departments in communities of all sizes in the State. Training courses also are provided for industries and institutions.

Course Offerings

During 1972-73, 280 fire training courses were funded, sponsored, or approved by the fire service training supervisor. This represents an increase of 80 training sessions over the previous year. In addition to the courses in general and advanced firemanship, a number of courses were conducted on special subjects.

SPECIAL COURSES

<i>Subject</i>	<i>Number of Programs</i>	<i>Number of Fire Departments</i>	<i>Enrollment</i>
Aerial Ladders	1	7	39
Aircraft Crash Rescue	1	30	198
Bomb Search	1	80	330

Officer Training	8	112	643
Petroleum Firefighting	2	170	593
Pumps and Hydraulics	13	98	521
State Fire School	1	43	111
Supervisory Methods	10	10	224
Transportation Hazards	2	47	198

Special Areas of Emphasis

Fire Service Training, in cooperation with representatives of industry, developed a standardized curriculum for training industrial fire brigades. Courses offered are six, 15, or 30 hours in length, depending upon the need of the plant involved. Industries were represented at 67 of the 280 courses offered during 1972-73.

Persons from the fire service and the staff of Fire Service Training compiled an instructional unit for 11 of the 16 subjects included in the general firemanship course.

Special Activities

The Petroleum Firefighting Conference, conducted in conjunction with the American Petroleum Institute, Virginia Petroleum Industries, and the Chesterfield Fire Department, was attended by 493 firefighters and fire officers. This attendance figure from Virginia and neighboring states reportedly would make this the largest single training session ever conducted on the East Coast. The instructors were from throughout the United States.

The Fire Officers' Institute sponsored by Fire Service Training was held in Alexandria in cooperation with the fire departments of the City of Alexandria, Arlington County, and Fairfax County. Fifty-seven Virginia fire departments were represented by 312 persons. Instruction included current fire problems, such as high-rise building fires.

In cooperation with the Virginia Heart Association, Fire Service Training offers to State Fire Instructors an eight hour course to qualified individuals in cardiopulmonary resuscitation. CPR is the technique for saving clinically dead persons by using artificial breathing and external heart massage.

Fire Service Training leased from the Hanover County Volunteer Firemen's Association the training grounds. Administrative headquarters for two fire training area supervisors are located at the State Fire Training Center. The center is available to any fire department upon request. Fire Service Training conducts courses requiring the use of special facilities available at the center.

Representatives of Fire Service Training participated in activities of the International Society of Fire Service Instructors, International Fire Service Training Association, the National Fire Protection Association Technical Committee on Fire Inspectors and Investigators Qualifications, and other national organizations, as well as the Virginia Firemen's Association and the Fire Chiefs' Association of Virginia. Material of interest was submitted to State and national media for publication.

HOME ECONOMICS EDUCATION

The staff of the Home Economics Education Service serves secondary school administrators and home economics teachers to develop a program to prepare students for homemaking or for employment in occupations using home economics knowledge and skills, and to motivate students who have scholastic and leadership abilities to attend college in preparation for professional careers in home economics.

The staff works cooperatively with Virginia colleges in the pre-service education of students who are preparing to teach home economics.

Scope of Program—In 1972-73, home economics education programs were operated in each of the State's school divisions. In these divisions 484 high schools and 14 vocational-technical centers offered home economics programs under the direction of 1078 teachers. Enrollment in all home economics courses, both in-school and out-of-school, totaled 119,950.

The in-school program enrollment totaled 94,073, including 91,868 pupils in consumer and homemaking classes (grades 8-12), and 2205 in home economics-related employment courses. Enrollment of disadvantaged pupils in home economics classes totaled 13,021. Within the total enrollment, 88,038 students were in the sequential consumer and homemaking courses, and 3830 students were in the specialized consumer and homemaking classes.

Adult preparatory classes in home economics also were held. Enrollment in consumer and homemaking classes for adults totaled 6847, 842 of whom received instruction in home economics through the Young Homemakers of Virginia organization, and 1094 adults were enrolled in preparatory adult home economics classes for employment. In addition, 17,094 adults participated in food production and conservation classes conducted in cooperation with the Agricultural Education Service.

Improvement of Instruction—Supervisory personnel visited 357 schools and worked with 625 teachers during 547 visits to schools to review teachers' work plans for the year, to observe units of instruction, to determine strengths and weaknesses in the program, and to make suggestions and recommendations for improvement in local programs.

Staff members worked with local administrators and teachers in 127 group meetings to discuss program offerings and course scheduling in consumer and homemaking education and in occupational offerings using home economics knowledge and skills.

In cooperation with local school administrators, the State staff served on evaluation committees which studied secondary school home economics programs.

A Statewide in-service education conference was held to assist home economics teachers in planning effective programs for the year ahead and in improving instruction. This annual conference's theme was Standards of Quality.

A week-long Coordination Institute for Occupational Home Economics Teachers was held, and 40 teachers, 10 supervisors and six teacher educators attended. The purpose of this institute was to develop and improve the procedures used by teacher-coordinators.

In June 1973, a Food Service Institute for food service teachers was held jointly with the National Restaurant Association and Radford College at Radford. The participants included 27 Virginia teachers, 13 West Virginia teachers, three Virginia assistant State supervisors, the State supervisor, the executive director of the Virginia Restaurant Association, and the director of the Virginia Restaurant Association. This week-long institute offered college credit for the teachers enrolled with that objective.

Development of Curriculum Materials—The last three sections of curriculum materials for consumer and homemaking education which were used as try-outs by teachers in the State were revised and edited for printing: Management in the Family, Individual Development in the Family, and Cultural Development in the Family.

The State Board of Education approved the "Guide for Consumer and Home-making Education in Virginia Secondary Schools." Plans were made for printing the guide so it would be available to teachers at the Annual Vocational Home Economics Education Conference which was held July 31-August 3.

Future Homemakers of America—Staff members planned and directed a Statewide leadership training meeting which was attended by representatives and advisers of the two youth organizations; the Virginia Association, Future Homemakers of America and Home Economics Related Occupations—Future Homemakers of America. The Future Homemakers of America organization, with a membership of 13,459 persons in 309 chapters, is designed to enrich and supplement classroom instruction. The membership is made up of students who are enrolled, or have been enrolled, in the home economics program. FHA activities supplement instruction in improving family living and preparing for entrance into home economics-related occupations. The Home Economics Related Occupations—Future Homemakers of America (HERO-FHA), has a membership of 155 persons in nine chapters which were chartered in Virginia last year.

Instruction for Adults—Staff members worked with local school administrators and teachers to develop instructional programs in consumer and homemaking education for adults and members of Young Homemakers of Virginia.

These courses included instruction in consumer and management problems of families concerning clothing selection and construction, meal planning and preparation, child development, home management, and the dual role of home-making and wage-earning. Primarily, classes were taught by regular home economics teachers as a part of the total program; however, in situations where large school enrollments made this impossible, part-time teachers were employed.

Occupational home economics education courses to prepare adults for work as homemakers' assistants and as child care assistants were taught in Norfolk. These classes and others in the State prepared 1094 adults for entry and advancement in such occupations as child care services, clothing services, home furnishings services, and home and institutional services. Particular emphasis was placed on work with disadvantaged adults.

In-School Instruction for Disadvantaged Students—A total of 13,021 disadvantaged students were enrolled in both consumer and homemaking and occupational home economics classes. These were students who, for specific reasons, were not succeeding in the regular school program. These courses were specially designed to hold potential dropouts in school and to enable the students to become better homemakers and wage-earners.

Improvement of Space and Facilities—Assistance was given to school divisions in planning 37 new and remodeled departments and in determining standards and preparing purchasing lists for equipment.

Staff members reviewed school building plans and offered recommendations for home economics department facilities, including departments for consumer and homemaking classes and for occupational home economics classes.

Cooperative Work with Other Services and Divisions—Interpretive materials about home economics education were distributed to guidance counselors, administrators, supervisors, and vocational directors and teachers who attended conferences and seminars during the year.

The special disadvantaged classes cooperated with academic and vocational education services. Visiting teams evaluated the programs.

In cooperation with the Bureau of Teaching Materials, new home economics reference books were reviewed and evaluated and a list of recommended books was made available to local school administrators and teachers.

Designs for new home economics departments were reviewed in cooperation with the School Building Service, and revisions were recommended to provide optimum facilities for instruction. These plans included departments for consumer and homemaking courses as well as instruction in occupational home economics.

Work with Colleges Preparing Home Economics Teachers—Heads of home economics departments and teacher educators from eight Virginia colleges who were approved to prepare home economics teachers met with members of the State staff to discuss new developments and certification changes in the home economics program. Special attention was given to working with the disadvantaged and handicapped as part of pre-service training.

As a result of the meetings, a committee composed of four teacher educators and college heads of home economics departments, two local supervisors, one State supervisor, and three home economics teachers met to make suggestions for the revision of the teacher certification standards for home economics teachers. These revisions were presented at a meeting of college heads and teacher educators, and additional changes were proposed. A final draft was made for presentation to the State Committee for Teacher Certification.

TABLE 12—IN-SCHOOL ENROLLMENT—1972-73

NUMBER OF TEACHERS	CONSUMER AND HOMEMAKING SEQUENTIAL OFFERINGS	CONSUMER AND HOMEMAKING SPECIALIZED AREAS	OCCUPATIONAL HOME ECONOMICS	DISADVANTAGED STUDENTS REACHED IN CONSUMER AND HOMEMAKING CLASSES	TOTAL ENROLLMENT

842	6,847	1,094	17,094	25,877	119,950

The colleges designed their programs to assist home economics education majors in working with the disadvantaged youth and adults in both the occupational and the consumer and homemaking education programs.

The assistant supervisors of the Home Economics Education Service visited colleges in their respective areas and met with home economics education majors to discuss the programs being developed in secondary schools. They also worked closely with the teacher educators in the colleges which train home economics teachers.

INDUSTRIAL ARTS EDUCATION

The goal of the Industrial Arts Education Service is to provide leadership for and guidance to school divisions to improve the industrial arts curriculum and instruction. During the 1972-73 session this was done through the use of the *1972 Industrial Arts Curriculum Guide*, coordination of in-service activities, and identification of the industrial arts role in the *Standards of Quality and Objectives for Public Schools in Virginia*.

Industrial arts courses were provided in 376 secondary schools in 93 school divisions with 908 teachers and 86,041 students.

In-service activities were provided by the staff in 18 school divisions. The staff coordinated college credit in-service classes for 179 teachers in The World of Construction at Virginia Beach and Fairfax and Roanoke counties, The World of Manufacturing at Augusta County, New Curriculum Pattern at Newport News and Petersburg, and The World of Communications at Virginia Polytechnic Institute and State University.

A conference for 230 industrial arts teachers was held August 13-16, 1972 at Richmond as a Statewide in-service program to examine the career education concept as a continuing and expanding responsibility for industrial arts. Two conferences for teacher educators were held during the year to intensify efforts to overcome the industrial arts teacher shortage, to evaluate the role of industrial arts within the context of the *Standards of Quality*, and to evaluate and recommend endorsement requirements for industrial arts teachers. Regional conferences for supervisors were held in September to plan and coordinate instructional improvement programs.

A curriculum council composed of teachers, teacher educators, supervisors, and administrators was established in December to assist the service in evaluating and planning curriculum improvements. Recommendations from the council assisted in identifying industrial arts courses to meet the orientation and exploration phase of the vocational education program standard of the *Standards of Quality and Objectives for Public Schools in Virginia*. Courses identified were: Exploring Technology, Modern Industry and Technology, American Industry, The World of Construction, The World of Manufacturing, The World of Communications, and The World of Transportation.

Projects totaling \$62,999 for equipment and salaries were approved under provisions of State Vocational Funds for the development of experimental industrial arts programs in seven localities: Buena Vista, Montgomery County, Nansemond City, New Kent County, Petersburg, Prince William County, and Tazewell County.

The service was represented at the Southeastern Industrial Arts Conference, the National Leadership Conference for Industrial Arts Education, and the

National Curriculum Development Conference for Vocational Education. The State supervisor presented a program at the International Conference of the American Industrial Arts Association and the assistant State supervisor served as host/chairman of the second annual Southeastern State Supervisors' Conference.

The State supervisor served as the leader of a State Department of Education Team to assist localities in implementing the Standards of Quality in the 12th Planning District. Guidance and assistance to the divisions was provided through two group meetings and 24 visits by the team leader.

The week of April 2-7, 1973 was declared Industrial Arts Education Week by Governor Linwood Holton. The Gubernatorial Commendation stated in part ". . . industrial arts assists students in the discovery and development of their personal aptitudes, creative technical abilities, and resourcefulness for living in a technological society. It assists the students in choosing and planning a career."

MANPOWER TRAINING SERVICE

In accordance with the policies of the State Board of Education and in cooperation with the Virginia Employment Commission, the Manpower Training Service is responsible for providing training in occupational categories for unemployed and under-employed youth and adults who qualify under provisions of the Manpower Development and Training Act of 1962, including the Amendments to the Act in 1963, 1965, and 1968. These amendments provide for basic education, orientation to work, and training and counseling services for individuals who are excluded from occupational training because of an inadequate educational achievement level. The act, as amended, also provides for refresher or other training for individuals who have become unemployed because of a need for specialized skills for advancement. All manpower training programs are approved for veterans training. Training is also provided for Neighborhood Youth Corps (NYC), Job Corps, Vocational Rehabilitation, and Work Incentive Programs (WIN). Armed Forces Personnel are trained under the Manpower Training Service for return to civilian life through Project Transition.

Basically, the purpose of the manpower development and training program is to reduce unemployment caused by automation, shifts in market demands, employment trends, and other economic changes, and to provide training opportunities for disadvantaged persons in Virginia. The program does not replace the need for existing vocational training but expands the training programs available for workers in all occupations. Close cooperation is maintained with the Virginia Employment Commission in an effort to identify vocational training needs and changes in employment patterns and trends in the State. The Manpower Development and Training Act mandates dual responsibility to the two agencies in the total operation of the program.

Staff members of the Manpower Training Service work with school divisions in their localities to achieve certain objectives. These include: providing assistance in organizing curriculum guides and course outlines and developing standards of occupational competency, preparing and reviewing budgets for each proposed training program, providing courses in instruction based on the needs of individuals who are to receive training, periodically reviewing and evaluating training programs, making recommendations for improvement and assessing the need for continuing the training, initiating steps to assure that training projects are formulated without delay, maintaining the quality and adequacy of the avail-

able training, and following-up all persons who complete courses in an effort to insure their success in the occupations for which they have been prepared.

During 1972-1973, 63 manpower training programs were planned, budgeted, and approved to train 2,136 persons in Virginia. Training was provided in 30 occupational fields in programs operated in 15 school divisions. The length of the programs varied from six to 100 weeks, depending on the occupational area.

Programs starting during 1972-1973 and those continuing from the previous year totaled 136 with an enrollment of 6,008. Manpower development and training programs graduated 4,024 trainees during the year.

Six multiple centers for unemployed workers provided job-oriented basic education, orientation to work, and occupational training. Job-oriented basic education was provided for school dropouts who had not completed the sixth grade and remedial education was provided for those functioning below the eighth grade. Guidance, counseling, and testing services were an integral part of each center.

In cooperation with the Norfolk City School Division, programs in eight occupational areas continue to operate as a part of the Norfolk Concentrated Employment Program. Orientation to work, job oriented basic and remedial education, occupational training, and counseling services were made available for all disadvantaged persons who were referred.

During 1972-73, four training centers continued to operate as officially designated Manpower Training Skills Centers. One center has been upgraded to qualify for official designation, and one center was established for the purpose of training military personnel enrolled in Project Transition. These centers provide services needed by the unemployed and underemployed youth and adults seeking employment, and are more permanent than other manpower training programs or centers.

An auto gas emission control program initiated during September 1971 was continued. This ecology program which involves independent garage owners and State and federal agencies is planned to inform auto mechanics and servicemen about the operation of the various auto gas emission control systems and components.

Accomplishments

During the year Manpower Training Service personnel:

1. Held nine project review and approval sessions in cooperation with representatives from the Virginia Employment Commission; the Bureau of Employment Security; U. S. Department of Labor, Department of Health, Education and Welfare; and the U. S. Office of Education.
2. Held 58 planning sessions with representatives of local school boards and local employment office managers.
3. Cooperated with business and industry in planning training methods to meet the needs of the employers and the available trainees.
4. Attended one regional conference on Manpower Development and Training.
5. Conducted two workshops for local manpower training supervisors.
6. Conducted a five-day in-service teacher training workshop for manpower training instructors.
7. Served as a member of the Virginia Manpower Operations Committee

working to coordinate the manpower services available through the various public agencies as set forth by the Cooperative Area Manpower Planning System (CAMPS).

8. Served as a member of the State Rural Areas Development Committee.
9. Attended one national conference on program planning for the Manpower Training Division of the American Vocational Association.
10. Conducted evaluation of five manpower training skills centers in cooperation with regional offices of the Department of Health, Education and Welfare and the Department of Labor.
11. Attended 10 Area Manpower Planning Board Meetings as a consultant.
12. Served as a member of a committee composed of representatives from five other states to recommend procedures for improving the evaluation techniques of Manpower Training Programs.
13. Attended a week-long workshop on the administration and leadership of vocational education programs, conducted by Virginia Polytechnic Institute and State University.
14. Attended 41 local meetings of the Ancillary Manpower Planning Board (AMPB).

SCHOOL FOOD SERVICE

The National School Lunch Act and the Child Nutrition Act are designed to safeguard the health and well-being of the nation's children and to encourage the domestic consumption of nutritious, agricultural commodities and other food. This is accomplished by assisting the State, through grants-in-aid and other means, to establish, maintain, operate, and expand school lunch and breakfast programs.

The school food programs are an important part of the total school operation. Research has proven that proper nutrition is related to the physical, mental, emotional, and social development of a child. It is necessary to provide nutritious meals in a relaxed pleasant atmosphere. Only then will proper nutritional habits be a way of life.

The food service programs are under the direction of local school divisions which determine the most desirable program for their system. All school divisions in the State participate in the National School Lunch Program. In five divisions, however, five junior and senior high schools served a-la-carte lunches for which there was no federal reimbursement. Breakfast programs with federal reimbursement have expanded as more school divisions realized that many pupils were coming to school with little or no breakfast.

Sixty-two local supervisors were responsible for directing the food programs in 41 school divisions.

Ten State staff members gave technical assistance and evaluated the local programs. The State staff also coordinated the programs and acted in a liaison capacity between the schools and the federal government.

The staff visited 930 schools and reviewed 747 lunch and 86 breakfast programs during the year. They also participated in 53 group meetings with an attendance of 2,050. Major emphasis was placed on providing lunches to more pupils and increasing the number of breakfast programs. Staff members assisted cafeteria personnel in improving their skills, in making the best use of equipment, and in learning more about nutrition.

A Nutrition Conference for School Lunch Personnel was jointly sponsored by the State School Food Service Office and Virginia Polytechnic Institute and State University, and 549 school lunch managers and supervisors attended the three-day conference.

The National School Lunch Act National School Lunch Program

Lunches served under this program provide one-third of the daily required nutrients for the child. Lunch was available in 1,786 schools with an average daily participation of 656,216. The number of lunches served to pupils totaled 114,769,651. Of this number 38,200,450 lunches were served free or at a reduced price. School divisions received reimbursement amounting to \$24,215,755 of federal funds and \$768,888 of State funds for the lunch program.

Twenty-eight floor plans for new and remodeled kitchens were reviewed, and recommendations were made concerning the types of equipment to purchase and the best location for the equipment to assure maximum use. These recommendations were designed to assist localities in making the best use of funds available for equipment, and also in reducing labor hours in food preparation and service.

In schools where the facilities were inadequate or the enrollment was too small to justify a cafeteria, recommendations were made to transport food.

Every effort was made to provide lunch services to all students. Only two schools did not have food service. Conferences were held concerning lunch programs in those schools.

The Child Nutrition Act

The Child Nutrition Act governs special milk and breakfast programs, non-food assistance, and the State administrative expense fund.

Special Milk Programs

In the 1,772 schools participating in the special milk programs, an additional 44,168,908 half-pints of milk were served to pupils at a reduced price. School divisions received \$1,679,246 in reimbursement.

Breakfast Programs

In the 36 school divisions operating breakfast programs, 195 schools served 3,210,932 breakfasts. The school divisions received \$551,757 in reimbursement.

Nonfood Assistance

The nonfood assistance program provided financial assistance in the purchase of needed equipment in schools which had inadequate facilities for expanding lunch programs or providing breakfast programs. In 47 school divisions, funds totaling \$234,457 were given to 86 schools.

State Administrative Funds

Approval was obtained for an addition to the professional staff of the School Lunch Service. These funds will provide for the salaries of the new staff member and supporting clerical assistance and for the purchase of office furniture.

Donated Foods

The State Department of Agriculture is responsible for handling and distributing donated foods made available by the U.S. Department of Agriculture. Staff members of the School Lunch Service work with the staff of the State Department of Agriculture to provide proper storage and the best use of these

foods. The National School Lunch and Breakfast Programs received donated foods with a wholesale value of \$9,826,092. "Cash in lieu of commodities," totaling \$2,023,212, was paid to the school divisions.

TRADE AND INDUSTRIAL EDUCATION

The local school divisions are assisted by the Trade and Industrial Education staff in developing and improving instruction. Staff members also work closely with local trade and industrial supervisory personnel in developing leadership and teacher training programs for vocational instructors.

Trade and Industrial Education encompasses such areas as industrial, service, and health occupations, and offers instruction designed to prepare persons for employment and to supplement skills and knowledge already attained. Students who plan to enter one of the occupational areas in trade or industry may attend preparatory classes. Those persons already employed may attend supplementary classes which are provided to improve their skills.

Preparatory programs also are provided for persons with special academic, social, or economic needs and for handicapped persons.

Preparatory Programs

New programs, new centers, and new buildings for existing programs were initiated during 1972-73 in approximately 40 localities. New vocational centers opened in Rockingham, Henrico, and Prince William counties and Radford and Virginia Beach cities. Among the new programs were 27 projects designed for handicapped students. Other localities continued to develop and expand their trade and industrial education programs. A total of 28,623 high school students were enrolled in all types of trade and industrial and health programs.

Ninety Industrial Cooperative Training (ICT) programs with an enrollment of 4,045 were operated in Virginia schools by 104 coordinators. Any junior or senior student 16 years of age or older with a trade and industrial occupational objective may participate in ICT. Such students are employed in an approved job for one half the school day and attend regular classes the other half. These students earned over \$5,100,000 during 1972-73.

Those persons who have left school and who wish to pursue occupational training on a full-time basis may enroll in post-secondary trade and industrial courses. Enrollment in these programs increased during the current year from 2,995 in 1971-72 to 5,837 in 1972-73.

Evening classes in trade and industrial education were offered for persons unable to attend day classes. Local school divisions provided these part-time preparatory courses and also provided preparatory classes designed to meet the needs of displaced and underemployed persons as well as the needs of local industry. Enrollment in adult trade preparatory classes was 5,439.

Health Occupations

The growth in health occupation classes continued as shown by the increased enrollment in 1972-73. This growth is partially a result of the direction provided by the Trade and Industrial Education Service. Assistance in the establishment of new practical nurse programs as well as other health occupation classes is provided upon request.

Secondary and post-secondary health occupation classes had an enrollment of 4,405 in 1972-73. This is an increase of 171 over 1971-72.

Technical Occupations

During 1972-73, 481 full-time students were enrolled in post-secondary preparatory technical programs. Courses offered in one post-secondary institution included architectural technology, electronic technology, mechanical technology, and police science. In addition, 73 persons received preparatory training and 130 received supplementary training in other technical classes. Trade and Industrial Education Service provided supervision for these technical programs.

Programs for Disadvantaged or Handicapped Youth

Special, exemplary, and cooperative programs were provided for disadvantaged or handicapped youth. Twenty-seven programs for the handicapped were sponsored jointly by Trade and Industrial Education and Special Education. The purpose of these programs is:

To provide opportunities for youth who are disadvantaged or handicapped to learn occupational skills in accordance with their abilities to prepare them for employment after they leave school.

To provide opportunities for youth to readjust to school discipline and to acquire sufficient knowledge which would enable them to reenter a regular school program.

A total of 5,599 disadvantaged and handicapped students received trade and industrial instruction in special programs in 1972-73.

Supplementary Programs

The enrollment totaled 16,080 employed adults in 881 technical, health, or trade occupation classes offered in 139 schools during 1972-73. Types of offerings include:

Technical—Advanced skill development;

Health—Supplemental classes to keep personnel abreast of current and new skills and techniques;

Trade—New skills and techniques emerging in trades;

Supervisory Personnel Development—To help employees prepare themselves for promotion to supervisory or managerial positions and to aid those supervisors and managers in the better performance of their jobs;

Safety and Job Training—On-the-job safety instruction throughout the year;

Apprentice Training—Group study and unit classes to regular registered apprentices;

Public Service—Classes for improving occupation skills of public service employees such as policemen and surveyors.

Summary of Additional Activities

To help meet the steadily increasing need for skilled workers in Virginia, Trade and Industrial Education programs expanded from an enrollment of 50,719 in 1971-72 to 58,119 in 1972-73.

State staff members worked frequently with school divisions in conducting surveys to determine community needs for growing trade and industrial offerings and evaluating and helping to improve existing programs.

The staff also attended a number of national institutes and conferences.

A number of in-service conferences and training programs were held throughout the year. Among these were:

Statewide trade and industrial education conference involving over 700 teachers and supervisors.

Two Statewide supervisors' and directors' conferences.

ICT coordinators' workshops, curriculum development conferences, and three area conferences for apprenticeship coordinators.

The Virginia Association of Vocational Industrial Clubs of America (VICA) had a banner year. Participation in one or more of the eight district leadership conferences, the State convention, and a number of district events totaled 8,603 trade and industrial education students and advisors.

In addition to their activities in the State, the Virginia VICA Association sent 75 representatives to the annual national convention in Tulsa, Oklahoma. Virginia again received recognition in several areas, including the placing of a Virginia student as national vice president, and one first, four second, and one third places in the skill contests.

Publications

Various publications developed by the State staff were:

"Trade and Industrial Education Graduate's Follow-Up Report," "Annual Statistical Report for Trade and Industrial Education," "VICA Review," (3 issues), "TIES," (4 issues), "Analysis of ICT Occupations," "Trade and Industrial Education Personnel Directory," "Library List of Trade and Industrial Education Materials," "Carpentry Curriculum Guide," "Auto Body Curriculum Guide," and "Policies and Standards of Quality Relating to The Initiation and Operation of Trade and Industrial Education Programs in Virginia."

TABLE 14—SUMMARY CHART: TRADE AND INDUSTRIAL EDUCATION—1972-73

PREPARATORY					SUPPLEMENTARY	
Secondary			Post Secondary		Adult	Adult
Regular	Disadvantaged	Handicapped	Regular	Handicapped		
23,024	4,224	1,375	1,030	4,807	7,579	16,080

VETERANS EDUCATION

The State Department of Education is the approving agency for institutions and establishments desiring to provide education and training for persons eligible under the provisions of Title 38, United States Code. The program is designed to assist veterans who may receive financial assistance under the provisions of the Veterans Readjustment Benefits Act of 1966, war orphans, and widows and dependents of seriously handicapped veterans.

The Committee on Veterans Education has established policies to be followed in carrying out the provisions of the law and in accordance with fundamental principles of education.

The following institutions are approved for the program: Virginia institutions of higher education accredited by the State Council of Higher Education, public and private vocational schools, hospitals accredited by the Council on Medical Education and Hospitals of the American Medical Association, and flight schools approved by the Federal Aviation Administration.

Private vocational schools must meet approval requirements established by the Department's Division of Vocational Education, and must have had two years of operation within the State before approval will be given for veterans' training.

During the year the committee received 221 applications for approval of courses from institutions in the State. Of these 199 were approved and 22 were disapproved.

The following changes were made during the year in the number of approved institutions: 270 institutions were approved as of July 1, 1972; 22 institutions were approved during the year; 271 institutions were approved as of June 30, 1973. Approvals for 21 institutions were withdrawn during the year.

Staff members made 356 visits to public, non-profit, and proprietary institutions in the State during 1972-73 to ensure that requirements of the law were being met, to inspect them prior to approval, and in response to requests from the Veterans Administration.

The committee received 806 applications from establishments requesting approval to train veterans on the job. Of this number 700 were approved. The following changes were made during the year in the number of approved establishments: 1,469 were approved as of July 1, 1972; 579 establishments were approved during the year; 2,012 establishments were approved as of June 30, 1973. Approvals for 36 establishments were withdrawn during the year. Members of the staff made 1,947 visits to these establishments to inspect them for approval and to determine if the requirements of the law were being met.

VOCATIONAL EDUCATION RESEARCH AND STATISTICAL INFORMATION

The Vocational Education Research and Statistical Information Service completed its first full year of operation in the State Department of Education under the supervision of the director of Vocational Education. The vocational education service works jointly with the Division of Educational Research and Statistics. The activities of the service were conducted in three areas during 1972-73: developing and implementing a vocational education reporting system for enrollment and follow-up information, supervising research projects funded under Part C of the Vocational Education Amendments of 1968, and coordinating

the activities of an 18-month project in career education located at Radford and Petersburg. While the activities of the staff are directly related to vocational education, the staff works with each service in the Division of Educational Research and Statistics.

Funds for research activities and projects are available for vocational education under Part C of the Vocational Education Amendments of 1968. Funds have been used for the operation of this service and for making grants to colleges, universities, and a local education agency.

Research Projects

During 1972-73, seven research projects were funded. Project applications were studied by the service in cooperation with the Division of Educational Research and Statistics and were reviewed and funded with the recommendations of project review teams and the Research Priorities Committee.

Research projects in progress during 1972-73 were:

1. An Evaluation System for Vocational Education in Virginia (Virginia Polytechnic Institute and State University)
2. Information Diffusion and Research Utilization in Vocational Education (Virginia Polytechnic Institute and State University)
3. Research on Problems Concerning the Establishment of a Learning Resources Center for DE in Virginia (Virginia Commonwealth University)
4. Follow-up Study of Former Occupational-Technical Students at Virginia Community Colleges: Phase 2 (Virginia Department of Community Colleges)
5. Learning Resources for the Disadvantaged Student (Second Phase) (Virginia Department of Community Colleges)
6. A National Review of the Goals and Outcomes of Community College Occupational-Technical Education (Virginia Department of Community Colleges)
7. Development of a Computerized System to Serve the Vocational Education Program for Loudoun County (Loudoun County)

Career Education

In January 1972 the State Department of Education received an 18-month grant from the U. S. Office of Education for a research and development project in career education. The project was for a career awareness program to be developed at Petersburg and Radford.

The Petersburg project has an elementary school and eighth-grade component which is directly related to curriculum development, a services and counseling component which is concerned with in-service training for teachers and guidance for students, and a placement component to assist persons leaving school. The Radford project was structured with an administration component, a career awareness component, a guidance and placement component, and a third party evaluation component.

The two cities completed the 18-month project and completed final reports for the U. S. Office of Education in June of this year. Both sites recommended the continuation of the career education developments, and both planned to expand their programs into all areas of their respective school divisions.

Vocational Education Reporting System

During 1972-73 an enrollment system for secondary education and adult education was used. The system had been piloted the previous year by Virginia Polytechnic Institute and State University. The system was used to report data on all vocational education enrollments and completions, and to provide preliminary information for developing the State plan for vocational education.

During the year a pilot study of the follow-up system was conducted with the assistance of V.P.I. & S.U.

Vocational Education Reporting System coordinators were appointed in each school division in Virginia. Six area conferences were conducted to give in-service education on the reporting system. The use of the computer has enabled the service to provide information for a number of purposes. It also has reduced the number of communications necessary with school divisions, schools, and vocational teachers.

PROGRAM DEVELOPMENT

The assistant superintendent for program development has general responsibility for planning, developing, and evaluating educational programs. With the assistance of his staff he is expected to be familiar with research and innovative developments in education and to provide leadership in developing appropriate programs for the State Department of Education and for public schools in Virginia.

Specific activities included in the Program Development Office include: planning for the Department and for public education in Virginia; assisting localities with planning and development of new programs; evaluating education programs; administering the State testing program; implementing the Standards of Quality and Objectives for Public Schools; conducting research; compiling statistics and administering data processing; coordinating all federal programs; administering Title III of the Elementary and Secondary Education Act (ESEA); and administering special programs for the gifted and/or talented, including the Governor's School for the Gifted.

DIVISION OF EDUCATIONAL RESEARCH AND STATISTICS

The activities of the Division of Educational Research and Statistics during 1972-73 are summarized under the following four functions:

Function 1: To Conduct Research Studies Requested by the State Board of Education and the State Superintendent of Public Instruction.

Research and Development Projects on Year-Round Education. The 1972 General Assembly appropriated \$1,000,000 for the 1972-74 biennium to support research and development projects on year-round education. Six projects, funded for a total of \$377,000, were conducted in 1972-73 in Loudoun, Prince William, Roanoke, and York counties, and the cities of Richmond and Virginia Beach. Allocations totaling \$531,000 were approved to continue these projects during 1973-74.

In connection with the study of year-round education, the Department and 12 cooperating school divisions sponsored the "Fifth National Seminar on Year-Round Education" in Virginia Beach in May 1973.

Survey of Seniors' Post-High School Plans. The 1972 General Assembly enacted *Standards of Quality and Objectives for Public Schools in Virginia, 1972-74*. Item 6 of the Planning and Management Standards states: "The superintendent shall, as directed by the Board of Education, make annual follow-up studies of former students (dropouts and graduates) who enter employment or who continue their education beyond high school as a means of assessing the effectiveness of the school program." As a first step in assisting school divisions in complying with this mandate, the Division of Educational Research and Statistics prepared a questionnaire, and a survey of Virginia's seniors was conducted in May 1973. The responses were tabulated and were sent to each school division. This information will be useful to curriculum and guidance personnel in evaluating the effectiveness of educational programs.

Function 2: To Encourage and Assist School Divisions in Designing and Conducting Pilot Studies.

The 1972 General Assembly appropriated \$75,000 for each year of the 1972-74 biennium to help localities prepare and conduct educational pilot studies. The purpose of State support for pilot studies is to encourage local school divisions to define their educational problems and to use new methods to solve them. Technical assistance and State funding up to 50 percent of the total cost of each approved project are available under the program.

During the 1972-73 school year 37 pilot studies were conducted in 28 school divisions. Included were a study conducted by the Art Education Service with the cooperation of eight school divisions and a study of drug education conducted in five school divisions for the Health and Physical Education Service of the Department. Thirteen of the 37 studies were continued from 1971-72, and 17 studies will be continued through 1973-74 or later.

All proposals for pilot studies are reviewed by the research staff of the division and by persons knowledgeable in the area of study. Projects which are approved for funding must be well formulated, clearly defined, and have potential Statewide value.

The following pilot studies were in progress during 1972-73:

A Thematic Approach to Virginia History and English (Fourth Year of Study, Albemarle County)

A Study of the Effectiveness of Latin Instruction in Increasing the Reading Skills of Intermediate II (Fifth-Grade) Pupils (Alexandria City)

A Study of the Effectiveness of a Commercial Instructional Program in Elementary Art Education (Alexandria City, Goochland County, Hanover County, Newport News City, Prince William County, Stafford County, Surry County, and Winchester City)

A Study to Determine the Effectiveness of Learning Activity Packages on the Learning Skills and Attitudes of Junior High School Students (Arlington County)

The Impact of a Guidance Program on Learning Climates of Elementary Schools (Augusta County)

A Study of the Influence of Practical Applications of Science and Machines in the Elementary Curriculum on Achievement, School Relations, and Self-Concept (Third Year of Study, Carroll County)

The Comparative Effects of a Resource Teacher Model and Self-Contained Special Education Class upon Educable Mentally Retarded Junior High School Students (Chesapeake City)

Comparative Effects of a Rogerian Model Open Classroom and Traditional Instructional Approaches upon Identified Behaviors of Sixth-Grade Students (Second Year of Study, Chesapeake City)

A Model for Focusing the Human Resources of the Chesapeake City Schools upon the Teacher-Learning Situation (Chesapeake City)

- Individualized Diagnostic Teaching Program in Reading (Third Year of Study, Chesterfield County)
- The Influence of a Learning Development Program on the Cognitive Growth and Learning Skills of Elementary Students (Third Year of Study, Chesterfield County)
- Individually Guided Education Resource Model (Fairfax County)
- A Comparison of the Effectiveness of the Harvard Project Physics Course with the Physical Science Study Committee Course (Third Year of Study, Fauquier County)
- Communications Core: An Approach for Use with Seventh-Graders to Bring Unity to the Study of Grammar, Reading, Literature, Creative Writing, and Speech as Companion Elements in Our Language (Second Year of Study, Fauquier County)
- A Search Toward Involvement Through a Social Studies Thematic Curriculum (Frederick County)
- The Relativeness of Double-Period and Single-Period Schedules in High School (Greensville County)
- A Study of an Individualized Program Which Provides Maximum Opportunity for Self-Instruction in French at the Secondary School Level (Second Year of Study, Henrico County)
- The Teaching of Reading in Content Areas (Henrico County)
- Drug Education for Eighth-Grade Health and Physical Education Students (Newport News City, Portsmouth City, Roanoke City, Roanoke County, and Tazewell County)
- Multi-Age Grouping of Overage, Underachieving Pupils in an Open Classroom with Emphasis on Reading and Mathematics to Determine the Extent Pupils Can Advance to Their Expected Levels of Performance (Pittsylvania County)
- An Analysis of Selected Variables in a Secondary Science Program (Prince William County)
- The Effect of a 45-15 Plan for the Year-Round Use of Schools and a Thematic Curriculum on Elementary Students Achievement, Attendance, and Personal and Social Adjustment (Second Year of Study, Prince William County)
- A Comparative Study of Varied Methods of Elementary Mathematics Instruction (Pulaski County)
- Individual In-service Teacher Training in Elementary Mathematics (Pulaski County)
- Individualized Diagnostic Teaching Program in Mathematics (Third Year of Study, Richmond City)

Intermediate Science Curriculum Study (ISCS) Published by Silver Burdette (Richmond City)

Teacher Self-Renewal (Roanoke City)

A Comparison of a Laboratory-Emphasized Biology Course with a Traditional or Lecture-Oriented Biology Course (Second Year of Study, Russell County)

Exploring Video Taping as a Means of Increasing Student Involvement and Communication Skills (Russell County)

A Study of the Effectiveness of Selected Materials and Structured Learning Situations for Use with Potential Dropouts in an Eighth-Grade Social Studies Course (Second Year of Study, Russell County)

Teaching Elementary Life Science by Inquiry Learning Through the Multi-Media Approach (Russell County)

Inquiry-Oriented Materials and the Resulting Development of Critical Thinking Skills in Grades 9, 10, 11, and 12 Social Studies (Tazewell County)

An Individualized, Programmed Method of Teaching Composition (Second Year of Study, Virginia Beach City)

Function 3: To Coordinate Educational Research in the State.

Examples of coordinating activities of the division include the following:

1. Six research and development projects on year-round education are being coordinated and monitored by the division, and members of the divisions' staff have made a number of presentations on year-round education to interested groups.
2. The division cooperated with 12 school divisions in sponsoring the "Fifth National Seminar on Year-Round Education," which was held in Virginia Beach on May 8-11, 1973. More than 700 persons, representing 40 states, and Guam, Puerto Rico, and Panama, attended the seminar.
3. Leadership and assistance were provided 28 school divisions in conducting 37 research projects under the Pilot Studies Program during 1972-73.
4. The following research reports were published by the division during the year:
 - "Pilot Studies Approved for State Aid in the Public School System in Virginia, 1972-73"
 - "The Effects of a Laboratory-Type In-service Summer Program on Experienced Elementary Teachers"
5. A staff member of the division represents the Department on the board of directors of Appalachia Educational Laboratory (AEL). The AEL, which operates in Kentucky, Ohio, Pennsylvania, Tennessee, Virginia, and West Virginia, is one of the regional education ventures established under

Title IV, Public Law 89-10, to find answers and new approaches to educational problems.

Function 4: To Provide a Two-Way Flow of Educational Data Between Local School Systems and the Department of Education.

The collection and dissemination of information about educational programs conducted in the State is an important asset in providing quality education. Through the use of data processing information can be provided quickly and in great quantity and depth for State and local use. Such data may be used in policy making, in interpreting educational programs to the public, and as a basis for educational research.

Educational information is collected by the Department from local school divisions through the fulfillment of regulatory obligations and through other service functions. Three prime goals under Function 4 are: (1) to reduce duplicate requests for data, (2) to increase the use and analysis of available information for decision making, and (3) to increase services to local school divisions.

In the development and analysis of an educational information system, the Division of Educational Research and Statistics concentrates on five sources of educational information. They are property accounting, financial accounting, personnel accounting, pupil accounting, and instructional programs accounting.

Explicitly stated in Function 4 is the responsibility for returning information to the local school divisions. This is also a prime consideration of any new system design. The information returned to the divisions consists primarily of summaries and analyses of data that will be useful for decision making at the local level.

Examples of specific accomplishments under Function 4 during 1972-73 are as follows:

1. In cooperation with the Division of Vocational Education and Virginia Polytechnic Institute and State University, developmental activities were completed for the first phase of a State reporting system for vocational education which was initiated during the 1972-73 school year. Course and program enrollment data were collected and processed for each of the more than 200,000 students enrolled in vocational education programs and for persons enrolled in adult vocational education programs.

The system is designed to facilitate the collection, processing, and dissemination of information for State and federal reporting purposes, program planning and evaluation, financial accounting, and other administrative purposes.

2. In cooperation with the Bureau of Teaching Materials (BTM), the automated system for the scheduling of films loaned to schools was expanded to incorporate the scheduling activities of the four regional BTM libraries (Madison College, Longwood College, Radford College, and University of Virginia). Scheduling materials were transported to and from the regional offices by courier. During the 1972-73 school year, 265,732 requests for films were processed.

In an effort to reduce the time and expense involved in preparing and printing the film catalogue and supplement, arrangements were made

to prepare the plates for printing the catalogue directly from computer magnetic tape.

3. In cooperation with the Finance Office, an automated system for accounting for funds disbursed to localities and other State institutions and agencies was developed. The system is designed to provide proper accounting control over disbursements made by the Department of Education and to maintain files to produce necessary reports and analyses.

The system provides for processing of requisitions approved for payment on a bi-weekly basis, printing vouchers which are sent to the comptroller's office authorizing checks to be drawn, maintaining a ledger, and printing notifications of payments to be mailed to county and city treasurers and division superintendents.

4. In cooperation with the Personnel Office and the Finance Office, planning and development began for a personnel-payroll system for employees of the Department of Education. The system will be designed to maintain up-to-date records on all personnel of the Department and to produce required periodic reports, including payroll, related to personnel.
5. Personnel of the Division of Educational Research and Statistics assisted the Governor's Task Force on Financing the Standards of Quality for Virginia Public Schools which developed recommendations for financing public education during 1973-74 and the 1974-76 biennium. Computer facilities were used extensively by the Task Force to test and analyze financially related variables proposed by the Task Force.
6. In cooperation with the Office for School Integration Services, a system was developed to process data collected through the Fall 1972 Elementary and Secondary School Civil Rights Survey. The system provides for summaries and analyses of pupil and staff information by racial-ethnic category.
7. At the request of the Board of Education, the Department began a study of future possibilities for increased use of data processing within the Department of Education and also the Department's obligations to and cooperative relations with the data processing operations within local school divisions and on a regional basis. The Department has contracted with Applied Management Systems, Inc., to assist with the study.

To collect information for the study, information will be gathered from key personnel in the Department of Education. All school division superintendents will complete a questionnaire and some superintendents will be interviewed on a sampling basis.

Department personnel also are participating in the development of a State government plan to consolidate computer resources.

8. Staff members served on subcommittees of the Committee for Evaluation and Information Systems, a standing committee of the Council of Chief State School Officers. The purpose of the Committee is to coordinate the collection and evaluation of information between the states and between the states and the federal government.

DIVISION OF PLANNING

The Division of Planning, which was established by the State Board of Education in November 1972, has two major responsibilities: to implement planning within the Department; and to provide planning leadership for local school divisions.

Long-range planning continued within the Department through biweekly meetings devoted to planning, initiation of a pilot program in planning by the Division of Vocational Education, and attendance by 12 members of the staff at a planning conference at the American Management Association (AMA) center in Hamilton, N. Y., in June. Planning activities, including work with the AMA, was financed through Section 411 of the General Education Provisions Act.

During the year the director of planning met in 15 of the State's 22 planning districts with Standards of Quality coordinators representing 103 local school divisions to assist in implementing the preparation of the five-year plan required by the Standards. The director also worked with the Charlottesville public schools and consultants on a local long-range planning project.

An evaluation report for the city of Hopewell was completed and 12 presentations related to the Standards of Quality were made to civic and professional groups.

OFFICE OF THE SPECIAL ASSISTANT FOR FEDERAL PROGRAMS

The Special Assistant for Federal Programs administers the Elementary and Secondary Education Act of 1965 (Public Law 89-10), and Public Laws 874 and 815, which provide federal funds for school operation and construction, respectively, in federally impacted areas. State plans, proposals, and reports for other federally connected programs are channeled through this office. Liaison activities between State and federal offices related to federal programs in education are handled through this office.

The organization for the administration of Title I of P.L. 89-10 includes: a director reporting to the assistant superintendent for instruction; three assistant supervisors with regional headquarters at Radford, Lynchburg, and Warrenton, who assist in developing local projects; a supervisor for comparability and evaluation; a supervisor of migrant education programs in the State; an educational grants advisor who reviews applications to make certain that they comply with the law, and with rules, regulations, and guidelines for administration of the program; an accountant and two secretaries.

The School Libraries and Textbooks Service is responsible for the detailed administration of Title II of P.L. 89-10. Title III of the law is administered by the coordinator for that program with the assistance of two assistant supervisors and an information specialist, who are responsible for programs, evaluation, and dissemination activities, respectively. The Department's Division of Educational Research is the liaison agency for the Title IV programs. The directors of divisions in the State Department of Education aid the special assistant in administering Title V, P.L. 89-10. Title VI-B, P.L. 91-230 (formerly VI-A, 89-10) provides funds to assist in the education of handicapped children, while Title VI-D is designed to prepare personnel for the education of the handicapped. The Division of Special Education is responsible for the detailed administration of

these programs. A program provided by the Education Professions Development Act (EPDA) is administered by the Division of Teacher Education. Title VII provides funds for bilingual education. As yet, no school division in Virginia has submitted a project for assistance in connection with this program which seems to indicate that bilingual education is not a problem in the State. The purpose of Title VIII is to provide funds for dropout prevention programs. Several projects have been submitted by local school divisions during the existence of this law, but none of them has been approved by the U.S. Office of Education.

An Educational Program Audit Service was established in the Federal Programs Office to provide the State Department of Education with the capabilities for objective examination of program operation, federal guidelines, and accountability factors in federal programs.

With the exception of Titles VII and VIII, a summary of the programs previously listed follows:

TITLE I, P. L. 89-10

Title I provides funds for compensatory education for educationally disadvantaged children whose performance is below the level appropriate for their ages and grades. These children must be reached through "target schools" in which the percentage of children from low-income families (those with incomes of less than \$2,000 per year) exceeds the percentage for the county or city as a whole, or schools in which the number of children of low-income families is higher than the average number of such children per school in the county or city. Title I also provides funds for educational programs for children in State-supported schools for the handicapped, in State-supported institutions for the neglected and delinquent, and for children of migrant agricultural workers.

Title I funds available to the State during 1972-73 totaled \$34,168,826 and included the following allocations:

For 248 projects for children in low-income families	\$31,354,823
For children in urban and rural schools	\$ 684,481
For children in State-supported schools for the handicapped	\$ 735,515
For State-supported schools for the neglected and delinquent ...	\$ 473,562
For grants to counties for the children of migrant agricultural workers	\$ 572,934
Administration	\$ 347,511

The Title I program has supplemented and reinforced State and local educational programs in many ways. Emphasis has been placed on determining the needs of educationally disadvantaged children, training teachers to teach them, and providing the media and environment to stimulate learning. Intensive in-service training was continued for Title I coordinators and teachers. The most frequent instructional activities were reading and language arts, cultural improvement, mathematics, and preschool programs, with major emphasis on reading and mathematics. The increased use of teacher aides and summer instruction for those who were educationally disadvantaged have been major factors in the success of the Title I program.

There has been a continuing trend toward involving more preschool and lower elementary grade children in Title I projects. Evaluations indicate that

greater and more lasting benefits can be expected from educational programs at these levels.

Evaluation reports from school divisions continue to indicate that progress has been made in changing attitudes, improving attendance, and accelerating learning by the disadvantaged child.

TITLE II, P. L. 89-10

Virginia's total allocation of Title II funds for 1972-73 was \$1,939,360. An average of \$1.59 per pupil in average daily attendance was made available to school divisions to be used in public and eligible private schools to purchase library books, audio-visual aids, and other instructional materials. This allocation was based on locally taxable wealth per pupil, books per pupil, and local expenditures per pupil for library resources.

Pupils enrolled in eligible private schools may borrow library materials purchased with Title II funds. During the school year 34,816 pupils enrolled in 120 private schools located in 42 school divisions availed themselves of this opportunity.

The Title II State Plan gives school divisions much latitude and responsibility for selecting library materials and also provides funds for establishing demonstration libraries and other special projects. Title II special purpose grants totaling \$180,000 were awarded during 1972-73 to 184 public and private schools in 76 school divisions. Awards ranged from \$350 to \$2,500.

TITLE III, P. L. 89-10

Title III of P. L. 89-10 provides funds to localities for the purpose of developing exemplary educational programs or seeking innovative solutions to educational problems. Local educational agencies submit project applications which are evaluated on a competitive basis. Cooperative planning by local educational agencies and participation of civic, cultural, and parental groups within the community is encouraged for Title III projects. During 1972-73, 45 projects were in operation.

More than 55 divisions with approximately 75 percent of the State's average daily attendance participated in some way in the Title III program. Project activities included career development, extended school year research, open-space concept for elementary students, in-service education for teachers, reading improvement and accountability, fine and performing arts, early childhood education, audio-visual services including library and educational television, curriculum study and revision, corrective and diagnostic services, adult education, pre-school activities, guidance services, dropout prevention, and activities for the slow learner, the underachiever, and the gifted. Funds amounting to \$2,687,842 were spent for Title III activities in Virginia during the year.

TITLE V, P. L. 89-10

Title V provides funds for strengthening state departments of education. The program continued to provide for the maintenance of 48 professional and clerical positions in the Department of Education. The Title V program during the fiscal year was expanded to include personnel, research, and professional and support services. An automated system was developed for accounting for funds disbursed to localities and other State institutions and agencies. Extensive

consultative and leadership services have been conducted which have strengthened the State Department of Education as well as the local educational agencies. Of the \$674,169 authorized, \$512,359 was spent from Section 503 funds as of June 30, 1973.

TITLE VI-B, P. L. 91-230 (formerly VI-A, 89-10)

Virginia's allocation from Title VI-B funds totaled \$772,173 for 1972-73 and was used to finance 34 projects for the initiation, expansion, or improvement of services for handicapped children. The 34 projects, which involved 63 school divisions, included educational activities and psychological diagnostic services for handicapped children and projects to develop curriculum material and plan strategies for regional cooperative programs.

EDUCATION PROFESSIONS DEVELOPMENT ACT (EPDA)

P. L. 90-35

Part B-2 of the Education Professions Development Act (EPDA) P. L. 90-35 is designed to attract and train teachers and teacher aides. The Division of Teacher Education is responsible for administering this program. The appropriation for 1972-73 totaled \$112,353. Local school division projects totaling \$51,041 were operated during the summer of 1972 and the 1972-73 school year. An additional EPDA program involving State participation is the Career Opportunities Program (COP) which provides college-level training to teacher aides so that they may fulfill college degree and State certification requirements for teaching. The State Department of Education is providing technical assistance in the Career Opportunities Program to two school divisions—Richmond City and Carroll County.

PUBLIC LAW 874

Public Law 874, originally enacted in 1950, provides funds for the operation of schools in counties and cities in federally impacted areas. To be eligible to receive these funds federally connected pupils in a school division must constitute a minimum of three percent of the total average daily attendance for the district, or 400 pupils. Funds are sent directly to the treasurers of the school divisions and are not distributed through the State treasury. Sixty-five counties, cities, and towns in Virginia received \$29,914,641 in P. L. 874 funds during the 1972-73 fiscal year.

This law also provides financial assistance to localities where school facilities are damaged or destroyed by natural or man-made disasters. During the 1972-73 fiscal year 23 school divisions received \$845,523 from this program.

PUBLIC LAW 815

Public Law 815, enacted in 1950, provides funds for school building construction in federally impacted areas. Administrative practices for this legislation are similar to those for P. L. 874, but additional emphasis is placed on a rapid increase in the number of federally connected pupils. No funds were received in the State of Virginia under P. L. 815 during 1972-73.

SPECIAL PROGRAMS FOR THE GIFTED

The 1973 session of the Virginia General Assembly authorized the State Board of Education, with the prior written approval of the Governor, to transfer not more than \$50,000 in the first year and \$250,000 in the second year of the 1972-74 biennium from actual or projected unexpended balances in certain specified funds to assist in the establishing of special Statewide projects for gifted children.

Pursuant to this action the Office of Special Programs for the Gifted was established in the State Department of Education. Administratively, and in accord with the newly revised organizational structure of the Department, the office was assigned to the assistant superintendent for program development.

During the late fall and winter of 1972, under the leadership of the secretary of education and the superintendent of public instruction, an advisory committee was appointed to explore the feasibility of establishing a Governor's School for the Gifted. The committee recommended:

That a Governor's School for the Gifted be established;

That the School be located in three centers: Mary Baldwin College, Staunton, June 20-July 18; Mary Washington College, Fredericksburg, June 20-July 18; The Virginia Museum of Fine Arts, Richmond, June 13-July 11;

That students attending Mary Baldwin and Mary Washington would live in the dormitories, and those attending the Virginia Museum would live at the University of Richmond;

That the curriculum include the four broad disciplines: the humanities, the natural sciences (including mathematics), the social sciences, and the fine arts;

That 400 gifted and/or talented rising juniors and seniors from the public and private high schools of the State be selected for participation;

That the School be financed entirely with State funds.

In February, immediately after the appropriation for the program had been approved, the State Board appointed a director of special programs for the gifted, effective March 1. The first responsibility of the director was to take the necessary action to operate the Governor's School for the Gifted on the prescribed schedule. To achieve this objective, criteria by which public and private high schools would nominate students were developed and directors for the three centers were appointed by the State Board. A committee of seven members was named by the Board to select 400 students from those nominated to attend the School.

Of the 400 students selected for the School, 399 participated; one student failed to appear on the day of registration and there was insufficient time to make a replacement from the alternate selectees. Based on information the students provided indicating their first and second choices from the four broad categories of the curriculum, they were assigned to the centers as follows: 130 in the natural sciences and 19 in the social sciences at Mary Baldwin; 41 in the humanities, 30 in the natural sciences, 23 in the social sciences, and 56 in the fine arts at Mary Washington; 34 in the humanities, and 66 in the fine arts at the Virginia Museum of Fine Arts.

The curriculum was designed for enrichment rather than acceleration. In addition to concentrated study in their major areas of interest, the students were exposed through field trips, lectures and performances by visiting scholars and artists, and informal discussions to all aspects of the curriculum.

At the close of the fiscal year, the School was at its midway point. All indications were that the students, the staff, and the curriculum had been well-chosen, and that the first Governor's School for the Gifted would be a successful and worthwhile undertaking.

TESTING SERVICE

The newly created position of supervisor of testing was filled by the State Board of Education, effective June 1, 1973. This action divided the Guidance and Testing Service into two distinct services as provided by the reorganization of the State Department of Education approved by the State Board in August 1972.

The Testing Service is responsible primarily for two aspects of program evaluation—standardized testing and assessment. The activities of the Testing Service, which has been in existence for a number of years, are given in detail in the report of the Division of Special Services.

PROFESSIONAL AND EDUCATIONAL SUPPORT SERVICES

The assistant superintendent for professional and educational support services gives general supervision to the Division of Teacher Education and Certification and the Division of Special Services.

Responsibilities of the position include the following:

Serving as the Department's major consultant to deans of schools or departments of education and division superintendents concerning State Board of Education policies and standards for professional personnel.

Serving as the Department's major advisor to division superintendents regarding the establishment of grievance procedures for local school employees.

Administering the State Board's revised regulations for suspension, revocation, or denial of teaching certificates.

Serving as the superintendent's representative in making exceptions (in accordance with Board policies) to established certification requirements.

Acting as the superintendent's representative with respect to minor changes in specifications for school buses.

Recommending studies needed in the areas of professional and educational support services, assisting the director in planning such studies, and occasionally conducting studies.

Working in cooperation with the assistant for program development that necessary procedures are established and adhered to for adding new areas of endorsements to teaching certificates.

DIVISION OF SPECIAL SERVICES

The Division of Special Services assists public school divisions in activities related to guidance and testing, school buildings, pupil transportation, teaching materials, film production, and school libraries and textbooks. The scope of its services affects many phases of the public school program. The division's continuing objectives are:

To discover and promote practices and procedures which will improve instruction and guidance.

To assist localities in planning and constructing efficient and economical school buildings.

To encourage and assist localities to enrich children's learning experiences through adequate library services and materials—including textbooks, a variety of audio visuals, and equipment.

Reports of the 1972-73 activities of the services in the Division of Special Services follow in this order: Bureau of Teaching Materials, Guidance and Testing, School Buildings, School Plant Surveys, Film Production, Pupil Transportation, and School Libraries and Textbooks.

BUREAU OF TEACHING MATERIALS

Purpose and Scope

The major purpose of the Bureau of Teaching Materials and the four regional bureaus, located at Longwood College, Madison College, Radford College, and the University of Virginia, is to improve instruction through the effective use of instructional media. Regional bureaus assist in the evaluation, selection, and distribution of motion picture films and other media. The purpose of this service is accomplished by:

1. Distribution of educational motion pictures to public schools and State-supported colleges, private colleges engaged in training teachers (by special contract), the State Department of Health, county and city health departments, State and county agricultural agencies, Parent-Teacher Associations, and other agencies and organizations.
2. Providing consultative services to assist school divisions in selecting, acquiring, and distributing instructional media.
3. Cooperating with other Department services to review media materials such as filmstrips, audio tapes, slides, records, transparencies, study prints, and multi-media kits.
4. Evaluating educational motion pictures for purchase by the State and regional Bureaus of Teaching Materials and by local school divisions.
5. Providing assistance in pre-service training of supervisors and teachers in the use of media for instruction.
6. Providing assistance to other services of the State Department of Education to promote more effective use of materials by teachers.
7. Preparing graphic materials (transparencies and slides) for other divisions and services in the Department.
8. Furnishing media equipment and materials to other divisions and services

TABLE 15—DISTRIBUTION AND USE OF

State and Regional Total.....	10,309	16,246	140,071

Accomplishments

Automated Instructional Media System: This system provides for the distribution and information retention system for educational motion picture film. Initiated in the State Bureau two years ago, it now includes the four regional bureaus. The computer is used to automate the processes of film management. Information for the 1973 catalog, "Educational Motion Pictures for Virginia's Public Schools," is a by-product of the automatic system.

Conferences: The professional staff of the Bureau of Teaching Materials cooperated with supervisors requiring assistance in the preparation of audio-visual materials for State conferences. The service included the design and preparation of materials and the use of equipment and the management of media.

Distribution of Educational Motion Pictures: A total of educational motion picture films were booked from the State, regional, and division teaching materials centers by the public schools and State-supported institutions. The following table shows ownership of educational motion picture films by local school divisions:

<i>No. of Film Prints</i>	<i>No. of School Divisions</i>
0	25
1-100	25
101-500	41
501-1000	14
1001-5000	17
5000+	1

Equipment Loans: Videotape and other specialized equipment were made available to the professional staff of the Department. Additional carousel projectors and cassette tape recorders were acquired for the equipment pool.

Evaluation of Materials: The professional staff of the Department evaluated educational motion picture films and other media being considered for purchase.

Films, filmstrips, tapes, and over-head transparencies were acquired for the State and Regional Bureaus of Teaching Materials as the budget permitted.

Graphic Services: The graphic service of the Bureau of Teaching Materials produced transparencies and 35mm slides for various divisions and services in the Department. Multiple copies of a series of transparencies on "Instructional Media" were produced for distribution by the State and regional libraries.

Media Presentations: The catalog, "Educational Motion Pictures for Virginia's Public Schools, 1972," listed presentations which are available from the State Bureau of Teaching Materials. Presentations were given as requested by the administrators of the public schools.

Publications: A supplement to the publication, "Educational Motion Pictures for Virginia's Public Schools," was distributed to the public schools and State-supported institutions on a ratio of one catalog for five teachers.

Regional Directors Conferences. Two meetings of directors of the Regional Bureaus of Teaching Materials were held. Policies were discussed and plans were formulated for the school year 1973-74.

Tape Duplication: Audiotapes from conferences sponsored by the Department of Education and programs from the educational tape library of the Bureau of Teaching Materials were duplicated and sent to the public schools upon request. Audiotapes were purchased to add to the holdings of the State tape library.

Title III, ESEA: A request was approved for the continuation of a Title III, ESEA, grant to be used for staff development. Included in the request were funds for further development of staff training in the Department of Education and in the public schools. Media equipment and materials were acquired.

Visitation: The professional staff visited local divisions and individual schools upon request. These visits included evaluations of services and facilities, recommendations for establishing film libraries and media centers, and workshops in the use of media in individual schools.

GUIDANCE AND TESTING SERVICE

Purpose and Scope

Guidance and Testing activities were included in one service until June 1, 1973. On that date a supervisor of testing was appointed and, as a result of a reorganization of the State Department of Education, guidance and testing were separated into two services. During the year activities of the Guidance and Testing Service included: visiting and consulting with local school personnel; participating in conferences, institutes, and workshops; evaluating school guidance services; working with community groups and agencies interested in guidance; and developing and providing certain materials for schools.

Guidance and testing personnel also assisted school divisions in accomplishing the following objectives:

Improving the guidance and testing services and extending them to all pupils.

Employing qualified guidance personnel.

Assisting each pupil in understanding himself and his strengths, limitations, interests, and needs.

Helping each pupil to select a program of study and to plan for the continuation of his education beyond high school.

Assisting pupils in career development and in making vocational choices compatible with their interests and abilities.

Assisting pupils in developing their potentialities, achieving worthwhile goals, and assuming responsibility for their decisions and actions.

Providing information to parents so that decisions affecting educational programs will be based on a realistic understanding of the pupil's abilities, interests, and the requirements involved in their educational and vocational goals.

Providing in-service training for the professional growth of staff members.

Evaluating the outcome of guidance activities to determine their effectiveness and to discover additional ways of improving these services.

Activities and Accomplishments

During the school year, members of the Guidance and Testing Service visited school divisions in the State and worked with individuals and groups interested in guidance. The staff participated in numerous local, State, and national conferences and meetings. These included: preschool and other local conferences for teachers and counselors; district guidance meetings; meetings with counselor education classes, local directors of testing, local supervisors of guidance, federal personnel, programs and civic groups; annual guidance conferences at counselor education institutions; State conferences with division superintendents, elementary and secondary principals, supervisors, visiting teachers, and vocational educators; and national career and testing conferences.

The staff also participated in meetings and conferences sponsored by the following professional associations: The National Conference on Guidance Counseling and Placement, Virginia Education Association, American Vocational Association, American Personnel and Guidance Association, National Vocational Guidance Association, American School Counselor Association, Association of Counselor Education and Supervision, Southern Association of Counselor Education and Supervision, Virginia Personnel and Guidance Association, Virginia Vocational Guidance Association, Virginia Counselor Education and Supervision, College Admissions Officers, Virginia Association of Collegiate Registrars and Admissions Officers, and the United States Office of Education.

Members of the staff also served on evaluation committees, reviewed guidance materials for use in elementary and secondary schools, and updated professional materials needed by the staff.

By June 30, 1973, more than 1,510 practicing counselors—1,136 of whom held masters' degrees—met or exceeded the minimum qualifications adopted by the State Board of Education. Advanced degrees held by counselors as a group ex-

ceeded the provisions of *Standards of Quality and Objectives for Public Schools in Virginia 1972-74*. More than 76 percent of the counselors held advanced degrees. Of the 1,484 school counselors with two or more periods of guidance per day employed in the public schools, 1,191 were full-time counselors.

During 1972-73 guidance and testing materials were distributed to all secondary schools. These materials included three issues of *Guidance News and Views*, and materials needed in the State testing program. The bulletin, *Financial Assistance to Attend Virginia Colleges and Universities*, was revised and sent to all secondary schools in the fall of 1972.

Thirty-six divisions employed 110 counselors in the same number of elementary schools during the year. In addition, approximately 140 junior high, intermediate, and combined schools with elementary grades in 62 divisions were served by counselors. Some of the guidance programs in elementary schools were financed by Titles I or III of Public Law 89-10, the Elementary and Secondary Education Act (ESEA).

Reimbursement to school divisions for guidance personnel in secondary schools was made through the basic State-aid appropriation. Reimbursement was made to school divisions at the rate of 60 percent of the State Minimum Salary Scale. Ninety-six counties, 34 cities, and three towns received funds totaling approximately \$6,000,000. Counselors in these positions devoted four or more class periods per day to counseling.

The Statewide testing program continued to emphasize the use of tests for improving guidance and instruction. The following tests were given in 1972-73:

<i>Grade</i>	<i>Test Name and Form</i>
* 1	Metropolitan Readiness Test (Form A) These tests involved 75,000 pupils
* 2	Kuhlmann-Anderson Test (Form B) 7th Edition These tests involved 62,000 pupils
4	SRA Achievement Tests and Ability Test (STEA)— These tests involved 89,467 pupils
6	SRA Achievement Tests and Ability Test (STEA)— These tests involved 89,204 pupils
* 8	Differential Aptitude Tests Battery L These tests involved 73,381 pupils
9	School and College Ability Tests (SCAT 3-A) Sequential Tests of Educational Progress—(STEP 3-A) These tests involved 85,017 pupils
11	School and College Ability Tests (SCAT 2-A) Sequential Tests of Educational Progress—(STEP 2-A) These tests involved 68,400 pupils

All answer sheets for grades four through 12 were machine-scored by test-scoring agencies and the results were sent to the school divisions and to the Guidance and Testing Service. Tests for grades one and two were scored locally. Duplicate copies of class reports for the second grade were sent to the Department of Education.

* Indicates grades in which testing was optional.

SCHOOL BUILDINGS SERVICE

Purpose and Scope

The functions of the School Buildings Service are:

1. To review and approve plans and specifications for school buildings.

Section 22-152 of the Code of Virginia and regulations of the State Board of Education stipulate that the plans and specifications for all public school buildings, including additions and major alterations, shall be approved by the Superintendent of Public Instruction.

The *School Planning Manual* contains regulations governing the planning of school buildings in Virginia. This manual provides the basis for the review and approval of plans by the School Buildings Service.

2. To assist local school authorities in planning functional school plants.

The staff of the School Buildings Service assists local school authorities in studying building needs by analyzing proposed educational programs, population trends, enrollment patterns, and the adequacy of existing facilities and sites. Planning conferences are held with division superintendents, architects, and engineers, and the program for each new school or addition is reviewed in terms of current trends in school offering, size, and organization. Preliminary plans are studied to determine the best possible relationships of instructional spaces, services, housekeeping, safety, comfort, and economy, consistent with the site and available funds. Final working drawings are reviewed for planning and equipment details, construction, mechanical equipment, and adequacy of contract provisions.

3. To maintain school plant records.

Plans, specifications, and cost data are on file for all public school plants constructed in Virginia since 1948. An incomplete file is maintained for earlier schools. Drawings have been microfilmed and prints or duplicate microfilm are available to local school authorities.

A new school plant inventory and reporting system is being developed through the Division of Educational Research and Statistics to coordinate school plant identification for all agencies and to provide current information on school plant needs, cost, maintenance, and efficiency.

4. To recommend changes in the State Board's regulations governing school plant planning.

Studies are made through the Governor's Advisory Research Committee to keep school building design up to date and in line with educational developments. These studies involve reviews of information on building design, equipment, and construction and research related to school plant planning.

Activities and Accomplishments

During 1972-73 plans and specifications for 136 school construction projects were approved as listed in Table 7. Of these 58 were for relocatable units distributed as indicated in column headed *PF*.

Staff members also participated in school building surveys and held numerous conferences on individual school projects. Use of a file listing approved prefabricated units was continued. Cost data on school construction was collected and information about average cost and square footage was developed and distributed.

SCHOOL PLANT SURVEYS SERVICE

Purpose and Scope

The School Plant Surveys Service assists local school divisions in studying and evaluating school plant needs. The major responsibilities of the service are to organize and plan the function of the school survey committees, to be responsible for the preparation of the reports of the survey committees, to work with local school divisions in implementing local building programs, and to aid in the development of educational specifications.

Activities and Accomplishments

Studies of school building needs were made at the request of division superintendents and school boards in Bland, Carroll, Fluvanna, Franklin, Charles City, King and Queen, Powhatan, Rockingham, Shenandoah, Warren, and Wythe counties, the city of Danville, and the town of Poquoson. Limited studies also were made in the counties of Caroline, Grayson, and New Kent and the city of Galax.

Studies were made by committees composed of Department of Education staff members, division superintendents, and college personnel. Each study included projections of school enrollment through 1977-78, assessments of the conditions of existing buildings, and recommendations concerning the need for new buildings and for additions and improvements to existing buildings. The studies provided an objective analysis and information that were useful to superintendents and school boards in planning building programs to adequately meet their existing and future school needs.

Personnel from this service also served on committees in the development in systemwide evaluation reports and participated in assisting localities in implementing the *Standards of Quality and Objectives for Public Schools in Virginia*.

FILM PRODUCTION SERVICE

Purpose and Scope

The primary responsibility of the Film Production Service is to produce motion pictures and filmstrips on Virginia history and natural resources for public schools in the State. Films dealing with other areas of public education also are produced as well as films for other State governmental agencies. In producing educational motion pictures the staff does the research, writing, photography, editing, sound recording, and distributes the completed films.

The secondary responsibility of the Film Production Service is to produce color slides, photographs, tape recordings, and other audio-visual aids for staff use in the Department of Education.

Accomplishments

Filmstrips were the popular media item in 1972-73 nationally and also with the Film Production Service. During the fiscal year, requests for the production of filmstrips exceeded the requests for the production of motion pictures.

Of special interest was the number of requests for sound-tracks to accompany filmstrips. Almost every filmstrip produced by the service during the past year included a sound tape.

Pursuit of Excellence, a remake of the Standards of Quality filmstrip, was produced and distributed to Virginia school divisions in September 1972. To date 500 copies of this filmstrip have been produced.

A filmstrip entitled *Guidelines for Virginia's Special Education Programs* was completed for the Division of Special Education as an in-service training device to aid local educators in identifying exceptional children.

Scenic Design in Virginia was produced at the request of the English Service of the Division of Secondary Education. The filmstrip is intended for use in dramatic arts courses and co-curricular groups interested in scenic design; 525 copies of the filmstrip were made available for distribution.

Careers in Agriculture was produced jointly by the Agriculture Education Service and the Film Production Service to interest high school students in agricultural careers; 1,000 copies of the filmstrip were made available for distribution.

For the Foreign Language Service, five new filmstrips on ancient Greek and Roman culture were produced for Latin and humanities classes.

A special slide presentation showing the Governor's Mansion was produced to be used to train tour guides who show groups through the historic home.

Three filmstrips are currently in production. They are: *Living and Learning in Kindergarten* for the Division of Elementary Education to acquaint Virginians with the purposes and value of the public school kindergarten; *Secondary School Evaluation* for the Division of Secondary Education as an in-service orientation presentation for the school evaluation program; and a filmstrip for the Pupil Transportation Service to inform school administrators and bus drivers about school bus safety rules and regulations.

A film entitled *Virginia's Historic Golden Triangle* was produced in cooperation with the James Monroe Foundation. In this film early American history is seen in the original homes of famous Virginians who lived in Fredericksburg and the surrounding areas.

Other motion pictures completed included a set of four television spot announcements about vocational education. In addition, 150 radio spot announcements were distributed to Virginia radio stations to promote vocational education, and a film about Virginia parks is being remade for the State Park Commission to bring it up to date.

Personnel of the Film Production Service also served as consultants to assist the Division of Telecommunications in establishing its television production program and to community colleges media personnel in the motion picture production field.

Photographs for the Department's magazine, *Public Education in Virginia*, were made in response to requests. Staff members provided photographic services to various State periodicals and to groups publishing brochures. Special assistance also was given in connection with conferences held by various services and divisions in the Department of Education.

Consultative service also was provided for other State agencies and local school systems concerning the purchase of media and photographic equipment.

New educational motion pictures were previewed and recommendations for purchasing were made to the Bureau of Teaching Materials.

Members of the Film Production Service staff served as national judges for the Council on Non-Theatrical Events (CINE), a non-profit organization based in Washington, D. C., which operates for the purpose of selecting the best films produced in the United States for foreign film festivals.

Film Distribution

All motion pictures produced by the Film Production Service are made available at cost to the Bureau of Teaching Materials and to local media centers. During the year, more than 260 prints of films were distributed in Virginia. Twenty-six prints were sold and 50 films were rented to schools in other states. More than 2,000 filmstrips were distributed to Virginia schools.

PUPIL TRANSPORTATION SERVICE

Purpose and Scope

The major purpose of the Pupil Transportation Service is to promote the safe transportation of pupils to and from public schools. More than 68 percent of the pupils attending public schools in the State are transported in school buses. The number of pupils has increased annually during the past ten years.

Specifications for buses are established to provide maximum safety for pupils and economy of operation. Careful selection and proper training of school bus drivers is emphasized as well as programs designed to provide knowledge of safety procedures for riders. Adequate, efficient, and economical transportation systems are characterized by the following: sufficient buses to provide reasonable comfort, prevent overcrowding, and serve pupils and schools within reasonable time limits; bus routes which permit pupils to travel as directly as possible to and from school and which permit maximum use of the buses; and properly de-

signed school buses with provisions for a good preventive maintenance program and instruction for drivers in the care of equipment.

All school buses are inspected each year by representatives of the Pupil Transportation Service. Monthly inspections by competent mechanics also are required. These procedures are intended to insure that buses meet all requirements and that they are maintained in safe operating condition.

An adequate program of preventive maintenance also is stressed as a means for providing safe, dependable, and economical transportation. Emphasis is placed on the importance of properly designed facilities and competent mechanics in an efficient pupil transportation program. Visits to shops, discussions of maintenance problems with mechanics, and recommendations for better methods and practices have contributed to an improved maintenance program.

Surveys of transportation systems are made upon request. Maps showing recommended bus routes are prepared, presented, and explained to local school officials. Such transportation surveys involve a careful analysis of the data obtained from the school system under study and the preparation of a spot map which shows where pupils board buses. Routes are planned so that buses can operate at maximum capacity with time and distance reduced to a minimum.

Studies to determine the need for operating a public school bus system are made at the request of local school divisions which previously have not transported pupils at public expense.

Plans, specifications, and assistance are furnished by the Pupil Transportation Service to advise localities constructing new school bus repair shops or additions to existing facilities.

Accomplishments

Meetings with school bus drivers were held throughout the State to discuss many phases of school bus transportation. These included requirements for school bus drivers, safe transportation of pupils, observance of State laws, regulations of the State Board of Education, local regulations, and safe driving practices.

Two films, *The School Bus Driver* and *Riding Your School Bus*, which were produced by the State Department of Education, were used in the various school divisions to show the proper operation of the bus, to instruct pupils in safe riding practices, and to emphasize the importance of accepting the responsibilities of pupil transportation.

Regulations were adopted by the Board of Education for the distribution of a New Transportation Fund established to assist localities with transportation of pupils at public expense on public transportation buses. Nine localities transported 42,948 pupils under this program. Five of these localities met the cost of expanded school bus operation for the first time as a result of legal decisions.

A Statewide workshop for pupil transportation supervisors, mechanics, and school administrators was conducted to discuss changes in vehicle maintenance, shop operation, administrative requirements, and new federal safety standards which affect the operation of school buses.

During 1972-73 the number of buses in operation increased by 209; there was a gain of 9,106 in the number of pupils transported, and an increase of 1,862,541 in the miles traveled in transporting pupils.

These figures and those for the past five years, given in the following table, indicate that the number of children transported, the number of buses operated, and the number of miles traveled continue to increase.

TABLE 20—GROWTH IN PUPIL TRANSPORTATION—1968-73

YEAR	Number Pupils Transported (ADA)	Number Buses	Number Miles	Average Number Pupils Per Bus Per Day	Average Number Miles Per Bus Per Day	Cost Per Pupil	Cost Per Mile	Cost of Operation Less Gas Tax
1968-69	598,773	6,590	54,624,083	91	46	\$29.46	\$.323	\$17,637,364.09

During the 1972-73 session, 7506 publicly-owned buses and 15 privately-owned buses were used to transport public school pupils. This compares to 6,554 publicly owned and 45 privately owned buses in operation during the 1968-69 school year.

A summary of the cost of pupil transportation for 1972-73 is shown in the following tables.

SCHOOL LIBRARIES AND TEXTBOOKS SERVICE**Purpose and Scope**

The School Libraries and Textbooks Service assists school divisions in improving the quality of media services in the public schools. Guidance and leadership are provided by:

1. Offering supervisory and consultative service through visitation and correspondence;
2. Assisting in establishing library programs in new schools and in reorganizing library programs in old schools;
3. Informing media personnel and other educators in the State of the services of the Department and of new developments in the library service field through speeches and distribution of a newsletter;
4. Preparing and distributing lists of recommended teaching materials, bulletins, and memoranda, and compiling statistics relating to the library program;
5. Maintaining a professional library and a collection of juvenile literature to serve educational personnel;
6. Distributing State-aid funds for the purchase of library materials;
7. Administering the textbook program by coordinating the State program for the adoption of basal textbooks;
8. Administering the Title II, Public Law 89-10, program by distributing funds for the acquisition of library resources and other instructional materials available under the federal act;
9. Reviewing library designs for new schools;
10. Coordinating procedures for distribution and review by Department of Education staff members of books submitted by publishers;
11. Cooperating with other services of the Department by serving on visiting evaluation committees, by reviewing applications for federal projects, and by furnishing statistics and other information.

Accomplishments**State-aid Funds**

During 1972-73 State funds amounting to \$2,172,802 were allocated for the purchase of library materials for the public schools of Virginia. This appropriation, supplemented by local contributions, permitted the placing of orders amounting to \$3,259,203.

School Library Development Fund

The School Library Development Fund provides help to localities for the purchase of materials for new school libraries. The fund, established in 1964, provides \$2 per pupil enrolled in eligible schools. During the past year grants totaling \$43,470 were made to 43 schools in 24 divisions.

Professional and Library Collection Available to Education Personnel

The professional library of the Department continued to lend materials to school personnel throughout the State and to the agency's staff. A number of new books was added to the collection. The library subscribes to 156 magazines of professional interest which are available to staff members of the Department.

Books for K-12 and those pertaining to professional education are reviewed by staff members of the Department. A collection of these books is available for examination and use by school personnel, for exhibit, and for workshops and classes.

Certified Librarians

During 1972-73 Virginia's public schools employed 1,620 librarians with teaching certificates endorsed for library science. Of this number 888 were employed in 937 elementary schools, 375 in 251 high schools, 61 in 44 combined schools, 248 in 180 junior high schools, five in vocational schools, six in special education, 28 in supervisory positions, and nine in professional libraries and central processing centers.

Free and Rental Textbook Systems

The 1970 General Assembly appropriated funds to reimburse divisions which provided free or rental textbook systems at the rate of \$2 per child enrolled in public schools. During 1972-73 reimbursement totaling \$1,207,106 was made to 90 divisions. Of this amount \$576,914 was for free systems and \$630,212 was for rental systems.

Operation of Title II Public Law 89-10

Virginia received \$1,939,360 in federal funds for 1972-73 under provisions of Title II of Public Law 89-10. This money was distributed to localities for the purchase of school media resources for use by children and teachers in public, private, and State-operated elementary and secondary schools at an average rate of \$1.50 per pupil in average daily attendance.

During 1972-73 Title II special purpose grants of \$190,000 were awarded to 184 schools in 75 school divisions.

DIVISION OF TEACHER EDUCATION

Purpose and Scope

The Division of Teacher Education is responsible for administering the programs for teacher certification, approved teacher preparation programs, State teaching scholarships, in-service education of teachers, the Education Professions Development Act (Part B-2), and scholarships for law enforcement officers. The following is a summary of the division's responsibilities and activities during the 1972-73 fiscal year:

Certification of Teachers. Virginia statutes, like those in other states, require that teachers employed in the public schools hold certificates in accordance with regulations adopted by the State Board of Education. These regulations are published in the bulletin, *Certification Regulations for Teachers and Qualifications for Administrative, Supervisory, and Related Instructional Positions, 1968*. Additional regulations affecting certification endorsements for principals, supervisory personnel, elementary teachers, and reading teachers were approved by the State Board of Education in August 1972. The Board in February 1973 adopted regulations providing for new Pupil Personnel Services Certificates. The specific endorsement areas approved are guidance counselor (elementary and/or secondary), school psychologist, school social worker, and visiting teacher.

Annual Reports of Instructional Personnel, giving basic information for each regular teacher employed, are submitted to the division by the local school superintendents. The reports are examined to verify that each teacher employed holds the proper certification credentials. Master lists are prepared and used in the program of school accreditation.

During 1970-71 the State Board of Education approved the execution of contracts pursuant to the Interstate Agreement on Qualification of Educational Personnel, which created an interstate certification system for teachers. As of June 30, 1973, contracts have been executed with 25 states.

Approved Programs in Teacher Preparation. In September 1968 the State Board of Education adopted Standards for Approval of Teacher Preparation Programs in Virginia colleges and universities. The Department of Education was authorized, upon receipt of acceptable credentials, to issue a teaching certificate to a graduate who has completed a State Board-approved teacher preparation program in a Virginia college.

The Department also was authorized to issue a regular Virginia certificate to a graduate of an out-of-state institution, if the program completed by the applicant is approved by the State Board and/or the department of education in the state in which the institution is located, and if it meets the minimum standards of the National Association of State Directors of Teacher Education and Certification.

State-approved teacher preparation programs in Virginia colleges and universities in effect as of June 30, 1973, are: Bridgewater College, Eastern Mennonite College, Longwood College, Lynchburg College, Madison College, Mary Baldwin College, Mary Washington College, Norfolk State College, Old Dominion University, Radford College, Randolph-Macon Woman's College, Roanoke College,

Stratford College, University of Richmond, University of Virginia, Virginia Commonwealth University, and Virginia State College.

During 1972-73 the Department evaluated the teacher preparation programs in the following institutions: College of William and Mary, Emory and Henry College, George Mason University, and Virginia Polytechnic Institute and State University; and revisits were made to Longwood College, the University of Virginia, and Virginia State College for renewal of approval.

State Teaching Scholarships. This scholarship-loan program, limited to \$450 per school year, is available to residents of the State who are preparing to teach in Virginia public schools. The scholarship aid, which is in the form of loans cancellable by teaching, may be used in any institution of higher learning in Virginia.

During 1972-73, 3,861 Regular Term Scholarships were granted. In addition, 140 Prorated Summer Quarter Scholarships were granted to prospective teachers who were working to obtain a degree in less than four years.

In-Service Education of Teachers. As a result of appropriations by the General Assembly, the State Board of Education has provided financial assistance to help teachers become more proficient in their teaching fields. These planned programs of in-service education for teachers constitute an important part of the effort to improve the quality of public education in the State. During 1972-73, 11,918 teachers were enrolled as follows: 9,440 in extension courses offering college credit in their teaching subjects; 749 in locally designed courses for non-college credit; 1,729 in summer graduate and undergraduate courses offered at State colleges to give selected teachers the opportunity to keep up with developments in history, economics, government, English, foreign languages, guidance, mathematics, science, reading, or other subjects usually taught in the public schools.

Education Professions Development Act. (EPDA) The Education Professions Development Act, Part B-2, is a program which is designed to attract and train teachers and teacher aides to meet critical shortages in the public schools. During 1972-73, the 10 school divisions listed below conducted EPDA B-2 training programs which cost a total of \$51,041.

Alexandria City	Teacher Aide Training	\$ 2,684
Carroll County	Teacher Training	4,070
Chesterfield County	Teacher Aide Training	4,208
Hopewell City	Teacher Training	1,650
Montgomery County (Open Classroom)	Teacher Training ..	7,344
Montgomery County (Reading)	Teacher Training	4,374
Orange County	Teacher Aide Training	2,561
Pittsylvania County	Teacher Training	3,532
Wise County	Teacher Aide Training	12,515
York County	Teacher Aide Training	8,103

Virginia's allocation for EPDA B-2, the State grant program, for the 1972 fiscal year totaled \$112,353. This grant for the 1972 fiscal year was the last received under the B-2 program which was not funded for the 1973 fiscal year.

An additional program funded through EPDA involved State participation. The Career Opportunities Program (COP) is designed to give college-level

training to teacher aides to help them fulfill college degree and State certification requirements for teaching. The Department of Education is providing technical assistance to the two school divisions, Richmond City and Carroll County, which are conducting COP programs.

Law Enforcement Scholarships. The General Assembly in 1972 amended the Code of Virginia by adding a section numbered 23-9.2:4, relating to the reimbursement of law enforcement officers for certain tuition costs. The Code states in part:

"The State Department of Education is hereby authorized and directed to enter into contracts to make payments to accredited institutions of higher education for tuition, books and mandatory fees, not exceeding eighty dollars per semester course or sixty dollars per quarter course per person, for law enforcement officers of the State, or of any county, city, or town thereof, enrolled on a full-time or part-time basis in courses included in an undergraduate or graduate program, which leads to a degree or certificate in an area related to law enforcement or an area suitable for law-enforcement officers. . . .

"Any person receiving the benefit of funds expended pursuant to this section shall be required to make reimbursement of such funds if he fails to satisfactorily complete the course or courses for which the funds were expended."

To carry out the provisions of this act, \$50,000 was appropriated for each year of the 1972-74 biennium. During the year ending June 30, 1973, \$29,431 was paid to the following colleges:

Central Virginia Community College	\$ 2,350
Clinch Valley College	237
New River Community College	10,631
Northern Virginia Community College	5,650
Old Dominion University	1,560
Radford College	115
Richard Bland College	553
Southwest Virginia Community College	1,754
Tidewater Community College	5,060
Virginia Highlands Community College	70
Virginia Polytechnic Institute and State University	506
Wytheville Community College	945

In addition, \$10,469 was paid to eligible recipients who completed satisfactorily one year of service as a law enforcement officer following completion of law enforcement courses.

DIVISION OF TELECOMMUNICATIONS

Activities of the Division of Telecommunications, which reports to the deputy superintendent of public instruction, were concentrated during 1972-73 on three primary areas: program approval; program procurement and production; and utilization.

All programs scheduled by the State's educational television stations showed obvious recognition of community needs and were approved for airing.

The Department of Education was represented at two meetings of the National Instructional Television Center's *MATTER OF FACT* consortium, where opportunity was given to react to program proposals, and at three meetings of the *INSIDE/OUT* consortium. As a result of the latter meetings an evaluation committee, composed of members of the Division of Elementary Education, the Health and Physical Education Service of the Division of Secondary Education, and the Division of Telecommunications, was formed, and viewed the first 19 programs in the series. Approval for in-school use was withheld for four of the programs, with the proviso that they could be used as part of the instructional program after thorough teacher in-service training and after an opportunity had been provided to ascertain community readiness for such programs. Five regional workshops designed to promote effective use of the series were coordinated by the Health and Physical Education Service and the Division of Telecommunications in preparation for the initiation of a series of local workshops designed for the same purpose.

Because of the interest shown by the Division of Vocational Education, tentative plans were made to participate in a career education consortium sponsored by National Instructional Television. The plans are contingent upon budget approval by the 1974 General Assembly.

The major emphasis during the year in television programming was a series of 15 social studies programs entitled *VIRGINIA!*, produced for use in upper elementary grades. Local and regional workshops were held in September to acquaint teachers and administrative and supervisory personnel with the purposes and objectives of the series. In March the curriculum committee which had planned the series originally outlined suggested revisions to be made in the telelessons and in the accompanying manual. These revisions were based on teacher recommendations, on information obtained from visits to classrooms, and on the committee members' assessment of the degree to which the programs and the manual met established needs.

Plans were completed with the Bureau of Research at the University of Virginia to evaluate the use of the *VIRGINIA!* series, both telelessons and manual. A meeting was held with the staff assigned to the project, evaluation instruments were designed, and surveys were conducted in predetermined regions of the State. A summary of the findings is due for completion during early fall.

Four two-day meetings of the curriculum committee for a proposed Virginia government series for secondary students were held, objectives and purposes were discussed, and a complete course outline is now in the hands of a scriptwriter.

A joint proposal was submitted by the Division of Telecommunications and the Office of Technical Assistance for a federal grant to fund the production of a series of in-school and in-service programs dealing with problems encountered

in desegregated secondary schools. A grant of \$227,000 was made by the Department of Health, Education, and Welfare (HEW) under the Emergency School Aid Act, and preparation for the series was scheduled to begin on July 1.

Five utilization coordinators were employed as of July 1, 1972, and one was assigned to each of the five ETV stations in the State. In addition to acting as liaison between the stations and the Division of Telecommunications, these coordinators viewed telelessons in classrooms, held conferences with high school teachers, met with departments and faculties of various schools, and held division-wide regional workshops to promote awareness of scheduled ETV offerings and to increase effective use of these programs. The coordinators held 322 meetings with division superintendents, 1,546 combined conferences with supervisors and local ETV coordinators, and 522 conferences with classroom teachers. They watched 220 educational television programs in classrooms, held 200 workshops, had 70 conferences with college personnel, and made 20 speeches to community groups.

The director of the division participated in 12 workshops, met regularly with the directors of instruction of the five ETV stations in the State and with the Virginia State Curriculum Advisory Committee for Telecommunications, established for the purpose of determining Statewide needs in telecommunications. The director also served on the board of the Virginia Council on Economic Education, represented the Department at a National Instructional Television meeting held in Atlanta for the purpose of determining future national needs in telecommunications, participated in the spring program of the Virginia Association for Educational Communication and Technology (VAECT), and attended the social studies conference in Norfolk, the Governor's Conference on Implementing Early Childhood Education, the annual meeting of the Southern Educational Communications Association, and the annual convention of the National Association of Educational Broadcasters.

The assistant supervisor held 18 workshops, conferred with 11 division superintendents, and attended three ETV station meetings, eight curriculum committee meetings, the elementary principals' conference, the Governor's Conference on Implementing Early Childhood Education, the supervisors' conference, the State social studies conference, the Southern States Work Conference, the meeting of the Southern Educational Communications Association, and the Management Development Seminar.

TECHNICAL ASSISTANCE PROGRAM OFFICE FOR SCHOOL INTEGRATION SERVICES

Effective February 1, 1971, the State Department of Education initiated a Technical Assistance Program which was funded through the Division of Equal Educational Opportunities of the Office of Education. The grant was made under Title IV, Section 405, of the Civil Rights Act of 1964 (Public Law 88-352). A second grant for continuation of the Technical Assistance Program was awarded the Department on May 15, 1972, and expired June 30, 1973. A third grant which allowed the Department to extend its services was awarded July 1, 1973, and will expire June 30, 1974.

The general purpose of the Technical Assistance Program, which is operated under the general supervision of the deputy superintendent of public instruction, is to aid school divisions in Virginia in identifying and resolving problems related to school desegregation and integration.

During 1972-73 the Technical Assistance Program:

1. Provided consultative services and assistance to local school officials in compliance with Title VI of the Civil Rights Act and the Regulation of the Department of Health, Education and Welfare;
2. Assisted local school officials in developing and initiating in-service programs and summer courses designed to help school personnel solve problems incident to desegregation and to achieve and maintain an integrated quality education program for all students;
3. Disseminated information on successful programs conducted in school divisions;
4. Identified problem areas in human relations and suggested appropriate procedures to resolve them;
5. Assisted in organizing guidance and counseling programs to meet the peculiar needs of pupils in desegregated situations;
6. Maintained and updated files and data on each local school system and prepared reports required by federal and State authorities;
7. Maintained contacts with appropriate officials in the Regional Office of HEW, the U. S. Office of Education, and the Civil Rights Division of the U. S. Department of Justice;
8. Recommended professional literature, teaching aids, and films to help local school officials establish unitary school systems;
9. Informed local school officials about federal communications relevant to school desegregation by means of Superintendents' Memoranda or by regional and/or Statewide meetings; and
10. Maintained cooperative relationships with the Consultative Resource Center: General Assistance Center at the University of Virginia.

The typical problem areas incident to desegregation in Virginia public schools were: intercultural communication and human understanding; contributions of black Americans and other minority groups to American society; black-white

professional relationships; pupil-teacher relationships, pupil-pupil and school-community relationships; standardized testing: interpretation, analysis, and utilization of results; diagnostic and evaluative techniques for the classroom teacher; grouping for instructional purposes; individualizing instruction; curriculum study and revision; integrated educational program; school organization: methods and techniques for working with pupils from diverse backgrounds, abilities, interests, and aspirations; administrative leadership in the desegregated school; personnel recruitment, promotion, and evaluation; student activities, rights, and responsibilities; school law as it relates to desegregation; guidance and counseling procedures in the desegregated school; selection and use of multi-ethnic and multi-level instructional materials.

The programs sponsored by the State Department of Education, with the cooperation of local school officials and other education agencies, incorporated one or more of the above problem areas, depending upon the needs of the particular situation. The duration of a program depended upon the intensity of the integration problems; however, programs tended to fall into the following categories: one-day workshops or in-service sessions during the regular school year; two-hour in-service sessions one day per week for several weeks during the regular school year; three-to-five hour in-service sessions on weekends during the regular school year; one-to-three day preschool workshops; one-to-three week summer institutes and workshops; and three-to-five day retreats.

Technical Assistance and Training Programs

During the fiscal year 61 local education agencies used the services of the Technical Assistance Program. Eight training programs were provided and consultative help was given to school divisions on 192 occasions.

Eight colleges and universities, 29 special agencies, and six publishing companies also received consultative help in identifying and resolving problems incident to school desegregation.

State Conference

The first conference sponsored by the Office for School Integration Services was held January 12-13, 1973, and dealt with student activities in desegregated public schools. The conference was designed to help directors and sponsors of student activities identify problems related to student activities, especially in desegregated schools, and find appropriate methods, techniques, and procedures for resolving and preventing them. Attendance totaled 149 persons representing 47 local and two out-of-state education agencies.

The second conference entitled "Curriculum and Instruction: Practices and Procedures in Desegregated Schools," was held on March 25-27. This conference was designed to assist officials, administrators, teachers, and non-teaching personnel in local school divisions in identifying problems related to curriculum and instruction, and in selecting appropriate methods and techniques for resolving problems, especially in desegregated schools. Forty-two school divisions were represented with 140 persons attending.
